

## **Lower Barn Poultry Unit**

The installation at Lower Barn Poultry Unit will be able to meet all the new relevant BAT conclusions along with the new BAT AEL's.

Houses 1-4 comply with BAT 32 a forced ventilation with deep litter and non leaking drinkers.

Houses 5-8 comply with BAT 32 f wet acid scrubbing.

A nutritional strategy will be employed reducing the levels of N and P

This will be verified by means of manure analysis and reported annually along with dust emissions based on the standard emission factor for broilers.

NH3 emissions will be calculated using the standard emission factor and reported annually.

Odour monitoring will be conducted weekly at the installation boundary by means of sniff testing by persons not directly involved in the poultry production.
