

True Hill Farm

The installation at True Hill Farm will be able to meet all the new relevant BAT conclusions along with the new BAT AEL's for rearing broilers.

A nutritional strategy will be employed reducing the levels of N and P

This will be verified by means of manure analysis and reported annually along with dust emissions based on the standard emission factor for broilers.

NH3 emissions will be calculated using the standard emission factor and reported annually.

Acid air scrubbers will be BAT 28 compliant.

Odour monitoring will be conducted as per Odour Management Plan.
