

SITE CONDITION REPORT GLADSTONE S1

COMPLETE SECTIONS 1-3 AND SUBMIT WITH APPLICATION

DURING THE LIFE OF THE PERMIT: MAINTAIN SECTIONS 4-7

AT SURRENDER: ADD NEW DOC REFERENCE IN 1.0; COMPLETE SECTIONS 8-10; & SUBMIT WITH YOUR SURRENDER APPLICATION.

1.0 SITE DETAILS	
Name of the applicant	EMR Recycling Ltd
Activity address	Liverpool Gladstone S1, Gladstone Dock, Seaforth, L20 1BE
National grid reference	SJ 32768 95657
Document reference and dates for Site Condition Report at permit application and	B2-07 Site Condition Report

Document references for site plans (including location and boundaries)	Appendix I - EMR Gladstone Dock - Ground Investigation V01
	Appendix II - Gladstone S1 Layout & Drainage (081020)
	Appendix III - Sensitive Receptors - S1

Note:

surrender

In Part A of the application form you must give us details of the site's location and provide us with a site plan. We need a detailed site plan (or plans) showing:

- Site location, the area covered by the site condition report, and the location and nature of the activities and/or waste facilities on the site.
- Locations of receptors, sources of emissions/releases, and monitoring points.
- Site drainage.
- Site surfacing.

If this information is not shown on the site plan required by Part A of the application form then you should submit the additional plan or plans with this site condition report.

2.0 Condition of the land at permit issue		
Environmental setting including:	Geology	
geologyhydrogeologysurface waters	Refer to Appendix I - EMR Gladstone Dock - Ground Investigation V01	
	<u>Hydrogeology</u>	
	Refer to Appendix I - EMR Gladstone Dock - Ground Investigation V01	
	Surface Waters	
	The site is adjacent to a dock system and the River Mersey - protected species (River Lamprey, Atlantic Salmon, Smelt, Sea Lamprey and European Eel) are within 500 metres of the site, and also a Special Protection Area (SPA) located within 1000 metres of the site	

		Also refer to Appendix I - EMR Gladstone Dock - Ground Investigation V01
Pollution history including: pollution incidents that may have affected land historical land-uses and associated contaminants any visual/olfactory evidence of existing contamination evidence of damage to pollution prevention measures		Refer to Appendix I - EMR Gladstone Dock - Ground Investigation V01
Evidence of histo example, historica assessment, remedire reports (where available)	al site investigation, diation and verification	Refer to Appendix I - EMR Gladstone Dock - Ground Investigation V01
Baseline soil and gro	undwater reference data	Refer to Appendix I - EMR Gladstone Dock - Ground Investigation V01
Supporting information	 Source information identifying environmental setting and pollution incidents Historical Ordnance Survey plans Site reconnaissance Historical investigation / assessment / remediation / verification reports Baseline soil and groundwater reference data 	

3.0 Permitted activities	
Permitted activities	Treat and store furnace ready scrap metal and cargo bottom fines.
	Treat of metal by shearing, burning, hot cutting and screening.
	Annual throughput will potentially be up to 1 million tonnes and the maximum storage capacity will be approximately 142,000 tonnes.
Non-permitted activities undertaken	Metals will be stored and periodically tested and exported as an 'End of Waste' product.
Document references for:	Appendix II - Gladstone S1 Layout & Drainage (081020)
plan showing activity layout; andenvironmental risk assessment.	Appendix III - Sensitive Receptors - S1
	Appendix Iva - (E02-02-01) Env Risk Assessment - Acceptance - Non Permitted Waste - (Gladstone)
	Appendix IVb - (E02-02-02) Env Risk Assessment - Acceptance - Permitted Wastes - (Gladstone)
	Appendix IVc - (E02-02-04) Env Risk Assessment - Storage Prior to Processing -

(Gladstone)

Appendix IVd - (E02-02-08) Env Risk Assessment - Equipment - (Gladstone)

Appendix IVe - (E02-02-09) Env Risk Assessment - Hot Cutting - (Gladstone)

Appendix IVf - (E02-02-10) Env Risk Assessment - Sensitive Receptors - (Gladstone)

Appendix IVg - (E02-02-11) Env Risk Assessment - Shearing - (Gladstone)

Note:

In Part B of the application form you must tell us about the activities that you will undertake at the site. You must also give us an environmental risk assessment. This risk assessment must be based on our guidance (*Environmental Risk Assessment - EPR H1*) or use an equivalent approach.

It is essential that you identify in your environmental risk assessment all the substances used and produced that could pollute the soil or groundwater if there were an accident, or if measures to protect land fail.

These include substances that would be classified as 'dangerous' under the Control of Major Accident Hazards (COMAH) regulations and also raw materials, fuels, intermediates, products, wastes and effluents.

If your submitted environmental risk assessment does not adequately address the risks to soil and groundwater we may need to request further information from you or even refuse your permit application.

4.0 Changes to the activity		
Have there been any changes to the activity boundary?	If yes, provide a plan showing the changes to the activity boundary.	
Have there been any changes to the permitted activities?	If yes, provide a description of the changes to the permitted activities	
Have any 'dangerous substances' not identified in the Application Site Condition Report been used or produced as a result of the permitted activities?	If yes, list of them	
supporting informationDescription of the changeList of 'dangerous substitution	 Description of the changes to the permitted activities (where relevant) List of 'dangerous substances' used/produced by the permitted activities that were not identified in the Application Site Condition 	

5.0 Measures taken to protect land

Use records that you collected during the life of the permit to summarise whether pollution prevention measures worked. If you can't, you need to collect land and/or groundwater data to assess whether the land has deteriorated.

Checklist of supporting information

- Inspection records and summary of findings of inspections for all pollution prevention measures
- Records of maintenance, repair and replacement of pollution prevention measures

6.0 Pollution incidents that may have had an impact on land, and their remediation

Summarise any pollution incidents that may have damaged the land. Describe how you investigated and remedied each one. If you can't, you need to collect land and /or groundwater reference data to assess whether the land has deteriorated while you've been there.

Checklist of supporting information

- Records of pollution incidents that may have impacted on land
- Records of their investigation and remediation

7.0 Soil gas and water quality monitoring (where undertaken)

Provide details of any soil gas and/or water monitoring you did. Include a summary of the findings. Say whether it shows that the land deteriorated as a result of the permitted activities. If it did, outline how you investigated and remedied this.

Checklist of supporting information

- Description of soil gas and/or water monitoring undertaken
 - Monitoring results (including graphs)

8.0 Decommissioning and removal of pollution risk

Describe how the site was decommissioned. Demonstrate that all sources of pollution risk have been removed. Describe whether the decommissioning had any impact on the land. Outline how you investigated and remedied this.

Checklist of supporting information

- Site closure plan
- List of potential sources of pollution risk
- Investigation and remediation reports (where relevant)

9.0 Reference data and remediation (where relevant)

Say whether you had to collect land and/or groundwater data. Or say that you didn't need to because the information from sections 3, 4, 5 and 6 of the Surrender Site Condition Report shows that the land has not deteriorated.

If you did collect land and/or groundwater reference data, summarise what this entailed, and what your data found. Say whether the data shows that the condition of the land has deteriorated, or whether the land at the site is in a "satisfactory state". If it isn't, summarise what you did to remedy this. Confirm that the land is now in a "satisfactory state" at surrender.

Checklist supporting information

- Land and/or groundwater data collected at application (if collected)
- Land and/or groundwater data collected at surrender (where needed)
- Assessment of satisfactory state
- Remediation and verification reports (where undertaken)

10.0 Statement of site condition

of

Using the information from sections 3 to 7, give a statement about the condition of the land at the site. This should confirm that:

- the permitted activities have stopped
- · decommissioning is complete, and the pollution risk has been removed
- the land is in a satisfactory condition.
