

4. Non-technical summary of application

- 4.1. This permit application has been prepared for a new Bespoke Environmental Permit for a deposit for recovery operation at A1 Motocross Track, Great North Road, Greetham, Stretton, Rutland, LE15 7SN (Site).
- 4.2. The Environmental Permit application seeks to construct an outdoor motocross track on the site of a disused quarry under a deposit of waste for recovery permit. The construction works will involve the use of 92,193 m³ of waste to be deposited at the Site. This volume has been calculated using the 'cut and fill' method.
- 4.3. The existing and proposed ground levels are shown in Cross Sections Drawing No. 185.03 Rev B.
- 4.4. The amount of waste required has been calculated to allow for a suitably designed track with associated berms, jumps, drainage, and visual and noise screens.
- 4.5. Strict waste acceptance procedures will be applied on the Site to ensure that only the permitted waste types are accepted, see Appendix 1 Waste Recovery Plan – Appendix 1 Waste Acceptance Procedures. The List of Waste codes are provided in this report, see Section 5 Waste Operations.
- 4.6. Waste will be brought onto the Site for use in the construction of the Site. The waste may be stored temporarily or placed directly into the recovery works. It is projected that the proposed works will be completed within a 1-year period.
- 4.7. There are no proposed waste treatment operations to be undertaken under the Environmental Permit.
- 4.8. A Dust Management Plan has been produced to support the permit application, see Appendix 5 Dust Management Plan. A Dust Management Plan was requested by the Environment Agency in the Pre-Application Advice Letter, see Appendix 6.
- 4.9. An Environmental Risk Assessment has been carried out for the proposed waste operations at the Site, see Appendix 8 Environmental Risk Assessment. The risk assessment concludes that no other management plans are considered to be required apart from the Dust Management Plan.
- 4.10. A Climate Change Risk Assessment has not been completed for this permit application as the expected number of years of operation is less than 5 years.
