

BRADGATE BAKERY

Environmental Policy

At Bradgate Bakery, we recognise that our operations can have both a positive and negative impact on the environment. We are committed to protecting the environment through prevention of pollution. We are also committed to working with communities local to our operation to improve our social impact.

We recognise that we have a duty to ensure our operations are performed in a manner that is sustainable and minimises the consumption of non-renewable resources.

To meet our environmental obligations, we will:

- Meet and, where possible, exceed all current and future applicable environmental legislation and customer requirements.
- Continually improve the environmental performance of our operation and focus upon pollution prevention.
- Adopt and develop best operational practices to reduce the environmental impact of our activities.
- Monitor, manage and minimise our use of energy and water, and reduce waste wherever possible.
- Ensure that our employees are aware of the environmental policy, aware of their obligations in relation to that policy and receive the necessary training and support.
- Plan, prepare, and regularly review our objectives, targets and action plans for improving environmental performance.
- Incorporate climate change assessment and climate adaptation planning within our Environmental Management System, ensuring suitable climate adaptation measures are integrated into our arrangements.

To ensure we meet our commitments, we will undertake periodic monitoring and review of our environmental performance and take corrective action where necessary. This policy will be reviewed annually.
