

Inventory of Raw Materials

Raw materials are stored within the building, wherever possible in their original packaging. Bulk liquids are not stored at the installation.

a) Biocides (includes disinfectants, wood preservatives, slimicides)			
Raw Material	Justification for use of this material	Quantity used (litres or kg per year)	Quantity stored on site (litres or kg)
Disinfectants	Required for sanitation and disease control	300 litres	100 litres
Detergents		300 litres	100 litres

b) Pesticides (includes herbicides, fungicides, insecticides, vertebrate control products)			
Raw Material	Justification for use of this material	Quantity used (litres or kg per year)	Quantity stored on site (litres or kg)
Rodenticides	Required for disease control	250 kg	140 kg
Insecticides		120 litres	10 litres
Herbicide		60 litres	20 litres

c) Veterinary medicines (excluding dietary additives)			
Raw Material	Justification for use of this material	Quantity used (litres or kg per year)	Quantity stored on site (litres or kg)
Prescription only products brought onto site when required	Animal health requirement	Minimal	None

d) Bedding types			
Raw Material	Justification for use of this material	Quantity used (litres or kg per year)	Quantity stored on site (litres or kg)
Soft Whitewood Shavings (dust removed)	Baled material for providing littered floor. Preferred over straw for animal health and dust reasons.	30,000 kg	500 kg

e) Fuels and oils			
Raw Material	Justification for use of this material	Quantity used (litres or kg per year)	Quantity stored on site (litres or kg)
Diesel (integrally banded generator day tank within 2 generators)	Backup generator fuel - generators not yet installed, required for animal welfare	400 litres	200 litres (estimated generator tank volume)
