Re: Additional information re appl P-11-03705-FU-MIN

Although further details of the proposed balancing facilities have been submitted the comments of 13th October 2011 from my colleague Charlotte Wright are still applicable and relevant for this development.

Then and now, FRM has no objections in principle to the overall drainage proposals indicated for this development but require further specific details of the drainage proposals as indicated in our initial e-mail.
