Subject: Re: Planning Applications for Incinerators, Leeds

Hi Clive

Thanks for the information. No adverse comments from me, I can't see this affecting our operations too much, especially as the unit is planning to leave Leeds Bradford in the summer and relocate south of Pontefract.

Best Regards Steve Cobb

Subject: Planning Applications for Incinerators, Leeds

Dear both,

Andy Bowden from Leeds Bradford Airport passed on your contact details to me.

I understand you may have already spoken to my colleague, Louise White, regarding the two applications we currently have for incinerators (Energy Recovery Facilities) in the Cross Green area of Leeds.

The CAA recommended that we contact yourselves to check whether or not you may have any comments in relation to the applications as the flues from the proposed facilities are between 75m and 90m above existing ground level.

The first site, ref 11/03705/FU is on the site of the former Skelton Grange Power Station and has twin flues of 90m height.

The other site, ref 12/02668/FU, is on the site of the former Wholesale Market in Cross Green (just south of Neville Hill Railway Sidings) and has a proposed flue of 75m height.

I would be most grateful if you could let me know whether you have any specific comments in relation to your operations. We have previously consulted the MoD, CAA, NATS and LBIA, none of whom object to the proposals. The CAA do recommend a steady red warning light for the 90m flues proposed for the Skelton Grange site.

If you could let me know if you have any comments by the end of this week, I would be very grateful.

Best wishes,

Clive
