Hi Joanne

I have contacted the operator. The interceptor was installed into an existing site drain which drains into the sewer in Eley Road I believe. The reason why that is not shown on the drawing is that we are unsure of the exact route as it was an existing connection.

Regards,

**Dave Alcock**

Dear Dave

**Environmental Permitting (England and Wales) Regulations 2016**  
**Application reference: EPR/WE5751AC/V003**  
**Operator: London Local Skips Limited**  
**Facility: London Local Skips, Eley Road, Enfield, N18 3BB**

Thank you for our phone conversation yesterday, 24/11/25.

I requested clarification about the site drainage, specifically if the surface water was held in a sump after it had been through the interceptor and was then tankered offsite or if it was released to the sewer. You offered to contact the operator to find out and come back with their response.

To help with validating your variation application, please can you provide the clarification as soon as you hear from the operator.

Thank you very much for your help.

Kind regards.

Joanne
