

A building expansion to enable 5<sup>th</sup> quarter processing to be undertaken. Currently 5<sup>th</sup> quarter has been undertaken in the existing building but a need for better hygiene and quality is required. This will increase the value of 5<sup>th</sup> quarter from previously rendering outlet to pet food/edible, moving the processes up the value chain.

Introduction of an additional boiler system of 2 x 1.5MW gas hot water boilers

**Section 5.4 Part A(1)(a)(ii)** – Disposal of non-hazardous waste with a capacity exceeding 50 tonnes per day by physio-chemical treatment. This installation of a new effluent treatment on site, will involve inlet works, large DAF, sludge dewatering and a connection to the sewer and associated tanks.

Updating of the refrigeration through the addition of propane and glycol gases accompanying the F-gas for use on site.
