

Amendments to existing references in EPR/DP3331MG/V004

	Existing	Amendment
Table S1.1 A1	“Appendix A3 site layout in application	“EnvaSiteLayout.pdf”
Table S1.1 A2(a)	“Boilers as shown on drawing Appendix 5b Rev 2 of the variation application EPR/DP3331MG/V003”	“As shown on EnvaSiteLayout.pdf”
Table S3.1 A1a to A7	Multiple references to Appendix A3 Schematic 1	Emission points to be amended to match the table listed in Emission Points.docx References match EnvaSiteLayout.pdf

Why are these changes required?

The references were accurate at the time of the last variation submission. However, the reference documents included in that submission.

EnvaSiteLayout.pdf is a current document that is maintained up to date within the Management System to reflect the most up to date site layout and therefore the reference will not require amending again on future variations.
