

Resource Efficiency and Climate Change

Energy Efficiency Improvements

As we are accredited to ISO14001, energy efficiency is managed via way of annual improvement targets which are established by the management team as part of the management review.

Extract from Business management system manual:

(B) SPECIFIC OBJECTIVES AND TARGETS

- *The company will set specific targets and objectives regarding Safety, Quality and the Environment.*
- *These targets and objectives will not be documented as part of the Business Management System Manual but will be discussed at Management Review Meetings*

Changes to the Energy activities use and create.

As a result of this variation there will be a minor increase in electrical usage for an increased number of pumps, level sensors and other controls.

Raw Materials and water usage.
