## Site Condition Report

1.0 SITE DETAILS	
Applicants Name	Leasingham Poultry Farm Ltd
Activity Address	
	Alan's Farm
	New Lane
	Leasingham
	North Kesteven
	Lincolnshire
	NG34 8XY
National Grid Reference	504728,348388
Document Reference for Site Condition	18 <sup>th</sup> August 2025
Report at permit application and surrender	
	Location Plan
	Layout/Drainage Plan

2.0 Condition of the Land at Permit issue	
Environmental setting including:  Geology Hydrogeology Surface Waters	The poultry unit lies on level ground to the west of Leasingham. Predominant land use is arable farming. Field pattern is semi large scale with a strong pattern of field boundaries. There are sensitive receptors within 400m of site, the nearest being 239m to the east.
	Topography and Drainage
	The poultry houses are between 25 and 35 metres above sea level. Soil bunding and tree planting will help to minimise the visual intrusion normally associated with poultry units. Site clean water drainage all goes to.
	Geology and Hydrogeology
	According to the BGS Extract British Geological Survey map shows that the

	Bedrock geology comprises Blisworth Limestone Formation Formation - Limestone. Sedimentary bedrock formed of the Jurassic period. Searches indicate the site is underlain with a Bedrock Aquifer — Principal/Secondary B. Superficial drift aquifer — None. The Site is situated in a Groundwater Vulnerability Zone - High. The site is situated within a Surface Nitrate Vulnerable Zone. The site is situated in a Groundwater/Source water protection zone — Zone 2 outer protection zone. The site is not situated in a drinking water protection/safeguard zone  Hydrology  General drainage is in a southerly direction. Average rainfall for this area is 1100 mm.
Pollution history including:	
Pollution incidents that may have affected land	None noted
Historical land uses and associated contaminants	Polluting substances – None noted Previous use prior to 2025 – Arable farming.
Any visual/olfactory evidence of existing contamination	None noted
Evidence of damage to pollution prevention measures	None noted

Evidence of historical contamination	N/A
3.0 Permitted Activities	Six poultry houses for Broiler chicken. This will give a total of 300,000 places. Heating will be provided by LPG heaters. The working area where vehicles operate is laid to concrete. Feed is delivered in covered lorries and stored on site in vermin proof steel galvanised bins. Immediately following depopulation, litter is removed off site and sold for land spreading. The houses are then washed and disinfected prior to the cycle beginning again. Underground storage tanks have been installed to catch all wash waters. Dead birds are removed from the houses and stored in sealed containers awaiting collection. Diesel fuel storage is in a bunded integral tank in the standby generator.
Non permitted activities undertaken	N/A
Document References	Location Plan Layout/Drainage Plan H1 Assessment
4.0 Changes to Activity	N/A
5.0 Measures taken to protect Land	Site will be operated in compliance with "how to comply" routine maintenance schedules are followed and recorded and with any abnormal operations recorded.
6.0 Pollution Incidents	N/A
7.0 Soil, gas and water quality monitoring	No monitoring will be undertaken at the installation.
