

Jacob's Assessment of Other Wastes from Mechanical Treatment

Classified as 19 12 12

The Jacob's assessment is a Technical Guidance report working with the Environment Agency (and the implementation of WM3) to determine the suitability of waste streams for Anaerobic Digestion and provides a Decision Framework to be applied to individual waste streams.

Question 1: Is the waste EWC coding listed on the standard rules permit?

Answer: Yes, 19 12 12 is included within the Standard Rules Permit SR 2021 No.6 Anaerobic Digestion with the Resultant Use of Biogas

As this EWC code is included with the Standard Rules Permit, it doesn't require further classification and it's suitability for anaerobic digestion has already been determined.
