

Form C2 Part 5C Non Technical Summary

The proposed changes to the existing permit are as follows:-

Add non hazardous EWC waste code 010599 (cement powder) to permit

Remove existing storage limit of 1650 tonnes under waste transfer operations within the existing permit

Increase the storage capacity of inert waste to 50000 tonnes under aggregate operations production within the existing permit

Consolidate permit to modern format

Updating the Environmental Management System (EMS) and Fire Prevention Plan (FPP) and associated procedures
