Hazardous components within the meaning of Regulation (EC) No 1272/2008 / CLP Regulation (2008) and corresponding classification: None

3. HAZARDS IDENTIFICATION.

Prolonged contact with exposed skin can cause freezer burn.

4. FIRST AID MEASURES.

Contact with skin:	Chillies can be an irritant to sensitive skin and direct contact should be avoided by the use of gloves. In the event of direct contact, rinse well with clean water. In addition, as the product is frozen , freezer burns can be caused with prolonged exposure to skin. Wearing of gloves is advisable when handling.
Contact with eyes:	Chillies and the vapour from them (especially when be chopped or heated) can be extremely irritating to the membranes of the eyes and exposure should be avoided by the use of suitable goggles. In the event of eye exposure to the fumes or direct contact with the eye, sluice copiously with sterile eyewash solution or clean water , and seek medical attention..
Ingestion:	Harmless when ingested in small amount. Large quantities can cause abdominal pain , and heavy sweating. Seek medical assistance if discomfort is prolonged
Inhalation:	Chillies and the vapour from them can be irritating to lung tissue, especially when chopped or heated. This can cause coughing and a sore throat. A laminar flow mask can minimize the problem. Affected persons should be removed from the area to fresh air and medical attention sought.
