### 5 Supporting information

#### 5a Provide a plan or plans for the site

Where you are altering the site layout, for example extending a shed or building additional sheds, you must provide an updated site plan.

We need a detailed site plan (or plans) showing:

- site location and the location of farm buildings and equipment (accurately drawn to scale, with a north-facing arrow)
- the installation boundary which should be clearly marked
- the plan must identify all of the land on which your activity takes place
- sources of emissions/releases (e.g. ventilation fans, incinerator, biomass boiler(s), heat exchanger(s), generator, slurry store)
- fuel and chemical storage (e.g. diesel, heating oil, LPG, pesticides, disinfectant and so on)
- the site boundary plan must be geographically correct (i.e. include fences, hedgerows or other features recognisable on site and should **not** be a schematic)
- site drainage (including clean and dirty water drainage routes, discharge points and site surfacing)

Document reference/s for the plans

#### 5b Provide a site drainage plan

Where you are altering the site drainage systems, for example extending the drainage system for the new buildings or adding an emission point, you must provide an updated site drainage plan. This plan should include clean and dirty water drainage routes, discharge points and surfacing.

Document reference for site drainage plan

## 5 Supporting information, continued

### 5c Provide a copy of your updated site condition report

Do any of the changes you plan to make need extra land to be included in the permit?

No

Yes  You must update and submit a copy of your site condition report for the extra land. **Provide the relevant sections of a site condition report.** The H5 Site Condition Report guidance and template is available online at <https://www.gov.uk/government/publications/environmental-permitting-h5-site-condition-report>.

Document reference for your updated site condition report \_\_\_\_\_

## 6 Environmental risk assessment

### 6a Provide us with an environmental risk assessment, which takes into account the impacts the changes to your installation pose to air, land and water.

The risk assessment must follow our guidance ‘Intensive farming risk assessment for your environmental permit’ or an equivalent method as a guide. See <https://www.gov.uk/guidance/intensive-farming-risk-assessment-for-your-environmental-permit>.

Document reference(s) for your updated environmental risk assessment \_\_\_\_\_

Where you are proposing to increase animal places you should include an ammonia impact assessment. Where your ammonia pre application screening indicated that detailed modelling was required you must provide a copy of the ammonia modelling report. **Include a copy of the modelling data files on a compact disc (CD).**

Where your modelling indicates the predicted process contributions are greater than the allowable thresholds your assessment and application should include ammonia reduction techniques to reduce the contribution to the allowable threshold. Please note that there is an additional charge for the assessment of the ammonia risk which must be submitted as part of this application. For the charge see <https://www.gov.uk/topic/environmental-management/environmental-permits>.

## 7 Emissions to air, water and land

If you are changing or adding emission points fill in Table 1 below with the details (such as ventilation from animal housing, standby generator, and carcass incinerator).

If you require more space to list all emission points, please provide this information on a separate sheet.

Please provide a summary of the main measures you use to control emissions from the farm.

Document reference

### 8b Odour, noise or dust and bio-aerosol

Where there are sensitive receptors within 400 metres (100 metres for dust) of the installation boundary or there has been a history of odour or noise complaints, you must assess the potential impact of odour, noise or dust and bio-aerosol emissions. If this applies, you must provide updated odour and noise management plans.

Document references for your updated noise management plan, odour management plan or dust and bio-aerosol management plan.

### 8c Raw materials

Where you will be using additional or new raw materials provide an updated raw materials inventory.

## 14 Declaration

**If you knowingly or carelessly make a statement that is false or misleading to help you get an environmental permit (for yourself or anyone else), you may be committing an offence under the Environmental Permitting (England and Wales) Regulations 2016.**

**A relevant person should make the declaration.**

Ensure a relevant person makes the declaration. A relevant person means **each** individual applicant (or individual trustee) who is applying for their name to appear on the permit; each person must complete this declaration so you will have to print a separate copy of this page for each additional individual to complete.

In the case of a registered company, this must be a person who is listed as a ‘current appointment’ at Companies House.

If you wish a manager or other employee to sign the declaration on behalf of the Company or Limited Liability Partnership (LLP) we will need a letter signed by a relevant person, that is an officer of the Company or a partner in the LLP confirming that the person has the authority to fill in the declaration.

In the case of a Limited Liability Partnership (LLP), it includes any partner.

**An agent acting on behalf of an applicant is NOT a relevant person.**

**I declare that the information in this application is true to the best of my knowledge and belief. I understand that this application may be refused or approval withdrawn if I give false or incomplete information.**

If you deliberately make a statement that is false or misleading in order to get approval you may be prosecuted.
