## 1 Introduction

### 1.1 General

- 1.1.1 Oaktree Environmental Ltd have been instructed to prepare this Non-Technical Summary (NTS) on behalf of Oxford Skip Hire Ltd (the operator) to support a permit variation application for Environmental Permit (EP) Ref. KB3104CQ.
- 1.1.2 The EP authorises a household, commercial & industrial waste transfer station with treatment facility situated at The Former Coal Yard, Thrupp Lane, Abingdon, Oxfordshire, OX14 3NG.
- 1.1.3 The EP was originally issued in November 2021 authorising operations in accordance with the SR2015 No6.
- 1.1.4 In March 2024 a permit variation was submitted to amend the permit boundary, this was approved and issued by the Environment Agency (EA) in May 2024.
- 1.1.5 As of December 2024, the EA withdrew a number of standard rules permits, including the SR2025 No6, and issued consolidated sets to replace these. Therefore, following the publish of these new rules sets, the EP is now a SR2022 No4.
- 1.1.6 The operator is seeking to vary the EP to bespoke, further details of the proposed operations including treatment processes are details in section 2.1 overleaf

## 2 Application proposals

### 2.1 Variation proposals

2.1.1 As outlined in section 1.1.6 above, the operator is seeking to vary the permit to bespoke for the operation of a household, commercial and industrial (HCI) waste transfer station with physical treatment facility (PTF).

2.1.2 The operator is proposing to vary the permit boundary slightly to include a small additional area, see Drawing No 2895-THR-01 in Appendix I.

2.1.3 The proposed annual throughput of waste to be accepted at the site will be no more than 24,999 tonnes per annum.

2.1.4 Proposed activities and treatment operations to be undertaken on site comprise of the following:

- a) Sorting (with loading shovel/360° excavator or by hand).
- b) Manual separation (by picking line).
- c) Mechanical separation (including overband magnets and density separator).
- d) Screening (by using appropriate mechanical screening plant / trommel).
- e) Storage (prior to removal).

2.1.5 Mechanical treatment operations will largely be undertaken within an open fronted building. The proposed layout including, processing and waste storage areas are illustrated on Drawing No. 2895-THR-03, see Appendix I.

2.1.6 All waste will be stored and treated on an impermeable surface with sealed drainage system.

2.1.7 Only non-hazardous waste will be accepted at the site for storage and treatment, a list of proposed EWC codes to be included in the EP are provided in Appendix II.

## 2.2 Limits of Activities

2.2.1 The following limits of activities set out in Table 2.1 below are proposed to be included in the EP and have been based on limits of a modern condition permit.

Table 2.1 - Proposed Permitted Operations

TABLE S1.1 activities

Subject to any other requirements of this permit wastes shall be stored for no longer than 1 year prior to disposal or 3 years prior to recovery.  No more than 24,999 tonnes per annum.  Waste types as specified in Appendix II.
AR2: Physical treatment facility	R3: Recycling/reclamation of organic substances which are not used as solvents  R4: Recycling/reclamation of metals and metal compounds  R5: Recycling/reclamation of other inorganic materials  R13: Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary	Treatment consisting only mechanical sorting, screening, blending or compaction of waste into different components for disposal (no more than 50 tonnes per day) or recovery.  Subject to any other requirements of this permit wastes shall be stored for no longer than 1 year prior to disposal or 3 years prior to recovery.  No more than 24,999 tonnes per annum.  Waste types as specified in Appendix II.
