

FPP – E02 - FIRE PLAN PROCEDURE Stored Material Inspection

All temperature monitoring will be carried out by a trained site operative using one of the sites hand-held temperature monitoring probes.

Daily Waste Pile Temperature Monitoring

1. All waste piles within the storage bays will be monitored twice daily.
2. Any material recording higher than 50°C will be removed and placed into the quarantine area for monitoring and cooling.
3. All temperature readings will be recorded on Form 2–Daily Pile Temperature Recording.
4. All material is subject to daily inspection in accordance with FPP-E01–Site Walkover Inspection
