EPR/EPR/LB3733DN/V004 - Variation Application

Our ref: L24/3

Dear Mrs Wynn

Further to your email below and our subsequent discussions and having liaised with my client I can confirm that the two mechanical processes (i.e the existing shear and the proposed fragmentiser) will be limited to 75 tonnes per day.

This was always the case with the fragmentiser.

I understand that this would therefore remain as a waste operation.

Kind regards

**Dan Walker MRICS**

Hi Caroline

Having checked with Goldstar I can confirm that the site doesn't de-can, it is noted that this will change the activity references.

Kind regards

**Dan Walker MRICS**
