

Non Technical Summary

1.0 INTRODUCTION

1.1 Scope

The Non Technical Summary supports the Variation Application from a Standard Rules (2022 No. 1) (EPR/CP3999SJ) to a Bespoke Environmental Permit by Welton Aggregates Limited, at Highfield Quarry, Welton Le Marsh, Spilsby, Lincolnshire, PE23 5SX.

The site currently operates under a standard rules permit (SR2022 No. 1) for the treatment of non-hazardous and inert waste to produce soil, soil substitutes and aggregate. The permit variation aims to change to a physical and chemical treatment activity inclusive of crushing, screening and soil washing to operate at the site and an extension of the permit boundary to accommodate the additional activity. The permit boundary location is presented in drawing 233320/D/001, D002, and the detailed site layout in drawing 233320/D/004.

The accepted wastes do not change and there is no increase in yearly throughput tonnage.

The application includes the Operational Plan (including waste acceptance and management controls), Dust Emissions Management Plan and site plans.

The application is being treated as a Substantial Variation with additional dust management plan assessment. The total application fee is £8,378.
