

Whinn Close Farm

The installation at Whinn Close Farm will be able to meet the new BAT AEL'S

A nutritional strategy will be employed reducing the levels of N and P

This will be verified by means of manure analysis and reported annually along with dust emissions based on the standard emission factor for broilers.

NH3 emissions will be estimated using standard emission factors and reported annually.

On a daily basis, odour levels at the installation will be monitored for high housekeeping odours. OMP amended accordingly.
