Basis of Report

This document has been prepared by SLR Consulting Limited (SLR) with reasonable skill, care and diligence, and taking account of the timescales and resources devoted to it by agreement with East Midlands Waste Management Limited (the Client) as part or all of the services it has been appointed by the Client to carry out. It is subject to the terms and conditions of that appointment.

SLR shall not be liable for the use of or reliance on any information, advice, recommendations and opinions in this document for any purpose by any person other than the Client. Reliance may be granted to a third party only in the event that SLR and the third party have executed a reliance agreement or collateral warranty.

Information reported herein may be based on the interpretation of public domain data collected by SLR, and/or information supplied by the Client and/or its other advisors and associates. These data have been accepted in good faith as being accurate and valid.

The copyright and intellectual property in all drawings, reports, specifications, bills of quantities, calculations and other information set out in this report remain vested in SLR unless the terms of appointment state otherwise.

This document may contain information of a specialised and/or highly technical nature and the Client is advised to seek clarification on any elements which may be unclear to it.

Information, advice, recommendations and opinions in this document should only be relied upon in the context of the whole document and any documents referenced explicitly herein and should then only be used within the context of the appointment.

Site Setting Plan, Drawing No. 003, dated March 2025

1.0 Introduction

1.1 Context

SLR Consulting Ltd (SLR) has been instructed by East Midlands Waste Management Limited (EMWM) to prepare an application for a deposit for recovery Environmental Permit (EP) for the construction of a buttress to stabilise the southern face of Saxon Pit, located at Peterborough Road, Whittlesey, PE7 1PJ (the Site). This Site Condition Report (SCR) seeks to support the EP application.

The EP application seeks to allow EMWM to treat and temporarily store incoming waste before depositing the waste in a buttress to stabilise the southern quarry face as a deposit of waste for recovery activity. The Site location, setting and layout is shown on the following drawings:

- Site Location Plan, Drawing No. 001, dated March 2025
- Environmental Permit Boundary and Site Layout Plan, Drawing No. 002, dated March 2025
- Site Setting Plan, Drawing No. 003, dated March 2025

A total of 216,700m³ of waste will be permanently deposited on the Site to construct the southern buttress. The annual throughput will be restricted to 50,000 tonnes per year, with a maximum of 20,000 tonnes of waste to be stored on the Site at any one time prior to deposit into the recovery operation

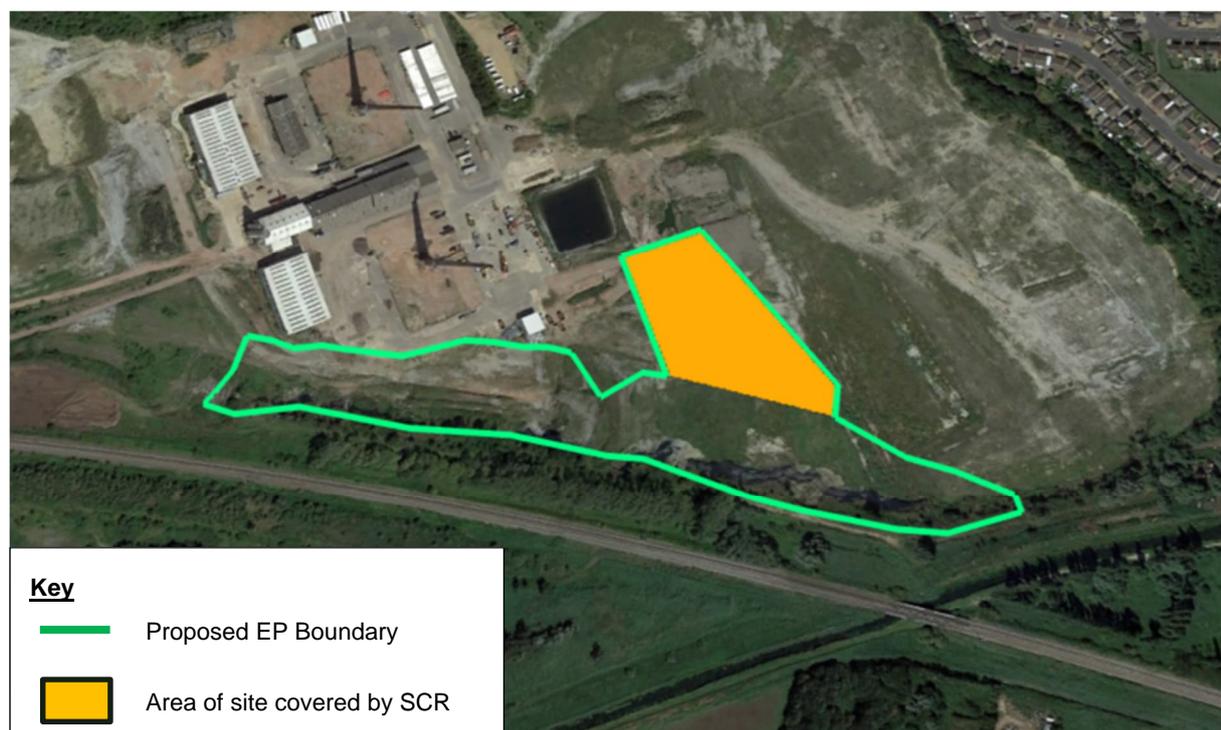

This SCR has been prepared in accordance with the Environment Agency's (EA) H5 Guidance Note on SCR¹. The objective of the SCR is to record and describe the condition of the land at the Site prior to operation. The SCR provides a point of reference and baseline environmental data so that when the EP is surrendered it can be demonstrated that there has been no deterioration in the condition of the land as a result of the operations, and ensure that the condition of the land is in a 'satisfactory state' on surrender of the EP.

In line with the H5 Guidance, this SCR relates only to areas of the proposed EP that will not be subject to the permanent deposit of waste. The area of the proposed EP boundary to which this SCR relates is labelled as the "*Material Reception Screening and Stockpile Area*" on Drawing No. 002, Environmental Permit Boundary and Site Layout Plan. For transparency, this area has been marked on Figure 1-1.

¹ Environment Agency – H5 Site Condition Report – guidance and templates, Version 3.0, April 2013

Figure 1-1 Relevant areas of the proposed EP area for the SCR

1.2 SCR Structure

Sections 1 to 3 of the EA's SCR template comprise the following:

- Site details;
- Condition of the land at permit issue;
- Geology;
- Hydrogeology;
- Hydrology;
- Pollution History;
- Evidence of historic contamination; and
- Permitted activities.

Sections 4 to 7 of the SCR template will be maintained during the life of the EP and Sections 8 to 10 will be completed and submitted in support of the application to surrender the EP.

An Envirocheck Report (Appendix A) is included as part of this SCR.

2.0 SITE CONDITION REPORT H5 TEMPLATE

1.0 SITE DETAILS	
Name of the applicant	East Midlands Waste Management Limited
Activity address	Saxon Pit Southern Buttress, Peterborough Road, Whittlesey, PE7 1PJ
National grid reference	TL 25781 96976
Document reference and dates for Site Condition Report at permit application and surrender	416.065341.00001_SCR
Document references for site plans (including location and boundaries)	<ul style="list-style-type: none"> • Site Location Plan, Drawing No. 001, dated March 2025 • Environmental Permit Boundary and Site Layout Plan, Drawing No. 002, dated March 2025 • Site Setting Plan, Drawing No. 003, dated March 2025

Note:

In Part A of the application form you must give us details of the site's location and provide us with a site plan. We need a detailed site plan (or plans) showing:

- Site location, the area covered by the site condition report, and the location and nature of the activities and/or waste facilities on the site.
- Locations of receptors, sources of emissions/releases, and monitoring points.
- Site drainage.
- Site surfacing.

If this information is not shown on the site plan required by Part A of the application form, then you should submit the additional plan or plans with this site condition report.

2.0 CONDITION OF THE LAND AT PERMIT ISSUE	
<p>Environmental setting including:</p> <ul style="list-style-type: none"> • geology • hydrogeology • surface waters 	<p>Geology</p> <p>A review of the British Geological Survey (BGS)² mapping reveals that the site is underlain by a bedrock of mudstone which is interbedded from the Oxford Clay Formation. It is sedimentary bedrock formed between 166.1 and 157.3 million years ago during the Jurassic period.</p> <p>Superficial deposits consist of sand, gravel and peat which were formed between 126 and 116 thousand years ago during the Quaternary period.</p> <p>Hydrogeology</p> <p>Review of the Multi-Agency Geographical information for Countryside (MAGIC)³ map reveals that both the bedrock deposits and superficial drift deposited underlying the Site are identified as unproductive. BGS Geoindex Onshore⁴ mapping shows the site to be underlain by rocks with essentially no groundwater.</p> <p>Groundwater Vulnerability</p> <p>MAGIC map shows the Site lies in an area of “unproductive” groundwater vulnerability.</p> <p>Source Protection Zones</p> <p>The Site is not located within a source protection zone for drinking water. The closest source protection zone, Zone II- Outer Protection Zone, is located approximately 12km northwest of the Site.</p> <p>Hydrology</p> <p>The Flood Map for Planning⁵ identifies the Site as lying in a Flood Zone 3 defined as “<i>Land within flood zone 3 has a high probability of flooding from rivers and the sea</i>”.</p> <p>There are a number of surface water features within a 1km radius of the site boundary. The nearest surface water receptor to the site is King’s Dyke located 69m to the south.</p>
<p>Pollution history including:</p> <ul style="list-style-type: none"> • pollution incidents that may have affected land • historical land-uses and associated contaminants 	<p>Pollution Incidents</p> <p>There are no on-site pollution incidents on record.</p> <p>Review of an Envirocheck report (Appendix A) produced for the Site reveals there have been four category 3 (minor incident) pollution incidents to controlled waters within 500m of the Site. The</p>

² British Geological Society mapping, available at <https://www.bgs.ac.uk/map-viewers/geology-of-britain-viewer/>, accessed in March 2025

³ Multi-Agency Geographical Information for the Countryside Map, available at www.magic.gov.uk, accessed in March 2025

⁴ British Geological Society Geoindex Onshore mapping, available at <https://www.bgs.ac.uk/map-viewers/geoindex-onshore/>, accessed March 2025

⁵ Gov.uk Flood Map for Planning, available at <https://flood-map-for-planning.service.gov.uk/>, accessed in March 2025

<ul style="list-style-type: none"> • any visual/olfactory evidence of existing contamination • evidence of damage to pollution prevention measures 	<p>closest pollution incident involved the release of oils (petrol) into a “freshwater stream/river” (Kings Dyke) on 8th July 1995.</p> <p>There are 8 records on the Substantiated Pollution Incident Register. The closest incident took place 64m to the southeast of the Site on 16th January 2018 and involved the pollutant “Specified waste materials: vehicles and vehicle parts”. The incident resulted in a category 1 (major incident) to land.</p> <p>Waste Management Activities</p> <p>Review of the Envirocheck report reveals there are four “historical landfill sites” located within 1km of the site. These were all owned by London Brick Company Limited, and the nearest one was located approximately 383m west of the site, which comprised of “deposited waste including inert waste”.</p> <p>There are three “Licenced Waste Management Facilities” registered on the Envirocheck Report within 1km of the Site. The closest of which is an existing deposit for recovery EP also located at Saxon Pit, Peterborough Road, Whittlesey, Peterborough, Cambridgeshire, PE7 1LQ located to the east of the Site.</p> <p>Details of the additional licensed waste sites are included within the Envirocheck Report (Appendix A).</p> <p>Control of Major Accidents Hazards (COMAH)</p> <p>A review of the Envirocheck report reveals that there are no COMAH sites registered within 1km of the Site.</p> <p>Licensed Discharges to Controlled Waters</p> <p>There are 12 licensed discharge consents within 1km of the Site, as identified within the Envirocheck report. The closest of these was 286m north by Anglian Water Services Limited and involved the discharge of unspecified sewage and trade combined effluent to a freshwater river.</p> <p>Historical Land Uses and Mapping</p> <p>A review of the historical mapping provided within the Envirocheck Report reveals that the area where the Site lies was principally used as agricultural land, until 1978 when the northwestern part of the Site began to be used as a Brick Works and the other half to the east as a clay pit. In 1992, the northwestern part of the Site became a part of Saxon Brick Works as a disused pit. In 2000, the whole Site became a disused pit. A 2024 map shows a lagoon on the northwestern boundary of the Site.</p> <p>Historical Surrounding Land Use and Mapping</p> <p>A review of the historical mapping provided with the Envirocheck Report indicates that the principal land uses of the immediate surrounding area are summarised below.</p> <ul style="list-style-type: none"> • 1887-1889- Surrounding land use is mainly for agricultural purposes with Snoot’s Road to the north and the “Ely & Peterborough Branch” railway running along the south of the site. The town of Whittlesey is shown circa 600m to the east of the Site. • 1902- Saxon Brick Works appears circa 500m to the west of the Site and Central Brick Works beyond that in the same
--	--

	<p>direction. Land-use in the vicinity of the Site is shown predominantly unchanged from agriculture.</p> <ul style="list-style-type: none"> • 1927- Star Brick Works and Victory Brick Works are shown for the first time on historical mapping to west, as well as an expansion of Saxon Brick Works and Central Brick Works. Public baths appear to the southeast of the Site and Whittlesey town is shown to have expanded in size. • 1938-1952- A clay pit and tramway have appeared to the northwest of the Site and appear to be associated with Saxon Brick Works. • 1978- The town of Whittlesey has expanded and is closer to the Site, with residential dwellings shown approximately 500m from the Site to the northeast. Clay pits are shown to exist to the north and the east of the Site. A series of buildings including kilns have been constructed to the north east of the Site. Residential dwellings and other properties have been constructed along Peterborough Road, to the north of "Church Field. • 2006 – Additional buildings shown within works to the northwest of the Site. • 2024 – first case of historical mapping where a lagoon is shown to the north of the Site boundary. Some of the buildings of the former works to the northwest of the Site appear to have been demolished/decommissioned. Remaining buildings labelled as "Factory".
<p>Evidence of historic contamination, for example, historical site investigation, assessment, remediation and verification reports (where available)</p>	<p>Appendix A - Envirocheck Report</p> <p>There has not been any historical site investigations, assessment or remediation and verification reports undertaken on the area covered by this SCR.</p>
<p>Baseline soil and groundwater reference data</p>	<p>N/A</p>
<p>Supporting information</p>	<p>Appendix A - Envirocheck Report</p>

3.0 PERMITTED ACTIVITIES

<p>Permitted activities</p>	<p>The activities at the Site will be regulated as a bespoke waste operation as per the Environmental Permitting (England and Wales) Regulations 2016 (as amended). Incoming waste to the site will be treated by screening where necessary and temporarily stored prior to deposit in the construction of the buttress as a recovery activity.</p> <p>The activities that will be carried out under the proposed Environmental Permit, as defined under Annex II of the Waste Framework Directive, can be summarised as follows:</p> <ul style="list-style-type: none"> • R3: Recycling or reclamation of organic substances which are not used as solvents. • R5: Recycling / reclamation of inorganic compounds – use of waste for the purpose of restoration of land.
-----------------------------	---

	<ul style="list-style-type: none"> R13: Storage of wastes pending any of the operations number R3 or R5. <p>It is noted that there is no proposed permanent deposit of waste (R5) in the area covered by this SCR.</p> <p>An environmental risk assessment has been carried out to identify the risks associated with the proposed operations at the site. The ERA concludes that the risks of contamination of land or groundwater will be low, taking into account the proposed control measures.</p>
Non-permitted activities undertaken	N/A
Document references for: <ul style="list-style-type: none"> plan showing activity layout; and environmental risk assessment. 	<ul style="list-style-type: none"> Environmental Permit Boundary and Site Layout Plan, Drawing No. 002, dated March 2025 416.065341.00001_ERA, dated April 2025

Note:

In Part B of the application form you must tell us about the activities that you will undertake at the site. You must also give us an environmental risk assessment. This risk assessment must be based on our guidance (Environmental Risk Assessment - EPR H1) or use an equivalent approach.

It is essential that you identify in your environmental risk assessment all the substances used and produced that could pollute the soil or groundwater if there were an accident, or if measures to protect land fail.

These include substances that would be classified as 'dangerous' under the Control of Major Accident Hazards (COMAH) regulations and also raw materials, fuels, intermediates, products, wastes and effluents.

If your submitted environmental risk assessment does not adequately address the risks to soil and groundwater, we may need to request further information from you or even refuse your permit application.

Sections 4 to 7 will be maintained throughout the life of the EP.

4.0 CHANGES TO THE ACTIVITY	
Have there been any changes to the activity boundary?	<i>To be maintained during the life of the EP</i>
Have there been any changes to the permitted activities?	
Have any 'dangerous substances' not identified in the Application Site Condition Report been used or produced as a result of the permitted activities?	
Checklist of supporting information	

5.0 MEASURES TAKEN TO PROTECT THE LAND

To be maintained during the life of the EP

Checklist of supporting information

6.0 POLLUTION INCIDENTS AND REMEDIATION

To be maintained during the life of the EP

Checklist of supporting information

7.0 SOIL GAS AND WATER QUALITY MONITORING (WHERE UNDERTAKEN)

To be maintained during the life of the EP

Checklist of supporting information

Sections 8 to 10 will be completed and submitted in support of the application to surrender the EP.

8.0 DECOMMISSIONING AND REMOVAL OF POLLUTION RISK

To be completed at EP surrender

Checklist of supporting information

9.0 REFERENCE DATA AND REMEDIATION (WHERE RELEVANT)

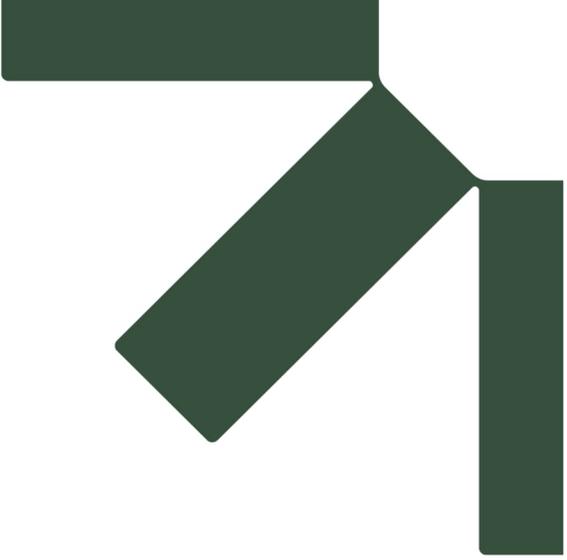

To be completed at EP surrender

Geology 1:50,000 Maps

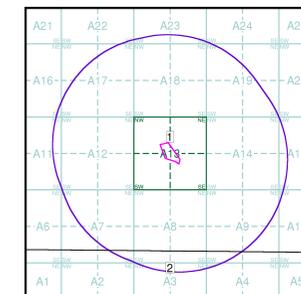

This report contains geological map extracts taken from the BGS Digital Geological map of Great Britain at 1:50,000 scale and is designed for users carrying out preliminary site assessments who require geological maps for the area around the site. This mapping may be more up to date than previously published paper maps.

The various geological layers - artificial and landslip deposits, superficial geology and solid (bedrock) geology are displayed in separate maps, but superimposed on the final 'Combined Surface Geology' map. All map legends feature on this page. Not all layers have complete nationwide coverage, so availability of data for relevant map sheets is indicated below.

Artificial Ground and Landslip

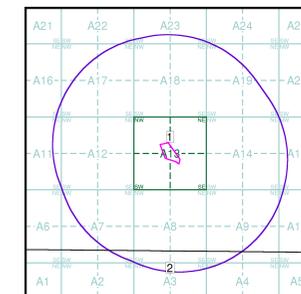

Artificial ground is a term used by BGS for those areas where the ground surface has been significantly modified by human activity. Information about previously developed ground is especially important, as it is often associated with potentially contaminated material, unpredictable engineering conditions and unstable ground.

Artificial ground includes:

- Made ground - man-made deposits such as embankments and spoil heaps on the natural ground surface.
- Worked ground - areas where the ground has been cut away such as quarries and road cuttings.
- Infilled ground - areas where the ground has been cut away then wholly or partially backfilled.
- Landscaped ground - areas where the surface has been reshaped.
- Disturbed ground - areas of ill-defined shallow or near surface mineral workings where it is impracticable to map made and worked ground separately.

Mass movement (landslip) deposits on BGS geological maps are primarily superficial deposits that have moved down slope under gravity to form landslips. These affect bedrock, other superficial deposits and artificial ground. The dataset also includes foundered strata, where the ground has collapsed due to subsidence.

Superficial Geology

Superficial Deposits are the youngest geological deposits formed during the most recent period of geological time, the Quaternary, which extends back about 1.8 million years from the present.

They rest on older deposits or rocks referred to as Bedrock. This dataset contains Superficial deposits that are of natural origin and 'in place'. Other superficial strata may be held in the Mass Movement dataset where they have been moved, or in the Artificial Ground dataset where they are of man-made origin.

Most of these Superficial deposits are unconsolidated sediments such as gravel, sand, silt and clay, and onshore they form relatively thin, often discontinuous patches or larger spreads.

Bedrock and Faults

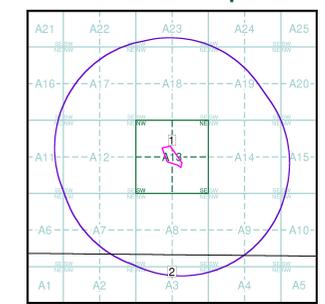

Bedrock geology is a term used for the main mass of rocks forming the Earth and are present everywhere, whether exposed at the surface in outcrops or concealed beneath superficial deposits or water.

The bedrock has formed over vast lengths of geological time ranging from ancient and highly altered rocks of the Proterozoic, some 2500 million years ago, or older, up to the relatively young Pliocene, 1.8 million years ago.

The bedrock geology includes many lithologies, often classified into three types based on origin: igneous, metamorphic and sedimentary.

The BGS Faults and Rock Segments dataset includes geological faults (e.g. normal, thrust), and thin beds mapped as lines (e.g. coal seam, gypsum bed). Some of these are linked to other particular 1:50,000 Geology datasets, for example, coal seams are part of the bedrock sequence, most faults and mineral veins primarily affect the bedrock but cut across the strata and post date its deposition.

Published 1886

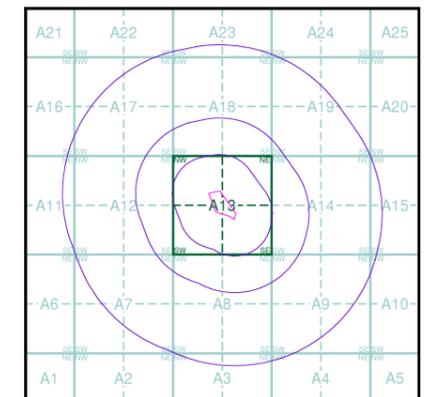

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 2000

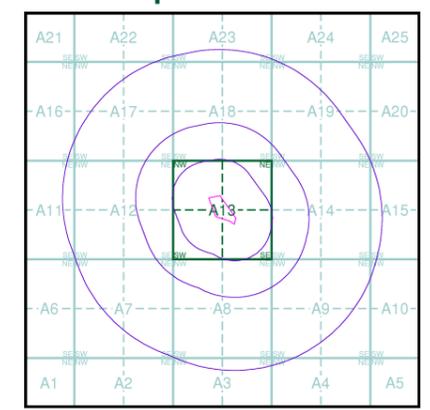

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

VectorMap Local

Published 2024

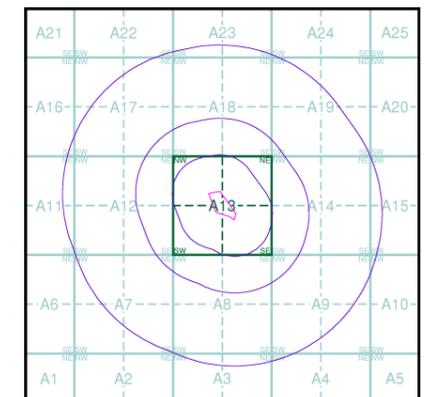

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a simple vector dataset at a nominal scale of 1:10,000, covering the whole of Great Britain, that has been designed for creating graphical mapping. OS VectorMap Local is derived from large-scale information surveyed at 1:1250 scale (covering major towns and cities), 1:2500 scale (smaller towns, villages and developed rural areas), and 1:10 000 scale (mountain, moorland and river estuary areas).

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Supply of Unpublished Survey Information

Published 1976

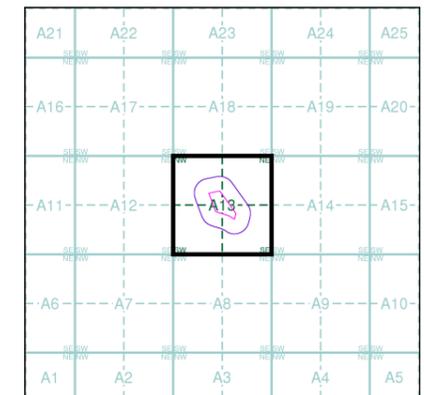

Source map scale - 1:2,500

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' plan as they showed updates of individual areas on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Report Section and Details	Page Number
Summary	-
<p>The Summary section provides an overview of the data contained within the report, detailing the number of data set features or the existence of a data set in relation to the buffer selected.</p> <p>For ease of reference, the report is broken down into 4 sections of data; Mining and Natural Cavities Data, Historical Land Use Information (1:2,500), Historical Land Use Information (1:10,000) and Ground Stability Data (1:50,000).</p>	
Mining and Natural Cavities Data	1
<p>The Mining and Natural Cavities Data section features data sets related to the existence of mining areas and their potential hazards; and details of naturally formed cavities.</p> <p>Data sets within this section are not plotted, with the exception of BGS Recorded Mineral Sites and Potential Mining Areas which feature on the Historical Land Use Information (1:10,000) map.</p>	
Historical Land Use Information (1:2,500)	3
<p>The Historical Land Use Information (1:2,500) section contains data captured from analysis carried out by Landmark of 1:1,250 and 1:2,500 scale historical Ordnance Survey mapping, identifying areas where, historically, the land uses were potentially contaminative.</p> <p>For the purpose of this Envirocheck module, only historical data relating to mining and ground stability has been included and plotted on the corresponding Historical Land Use Information (1:2,500) map. This section also includes the Subterranean Features data set, which details various man-made and man-used underground spaces obtained from the Subterranea Britannica society.</p>	
Historical Land Use Information (1:10,000)	4
<p>The Historical Land Use (1:10,000) section covers data captured from the systematic analysis carried out by Landmark of 1:10, 560 and 1:10,000 scale historical Ordnance Survey mapping dating back to the mid-19th century, identifying potentially contaminative past industrial land uses.</p> <p>For the purpose of this Envirocheck module, only data relating to mining and ground stability has been included and plotted on the accompanying Historical Land Use Information (1:10,000) map.</p>	
Ground Stability Data (1:50,000)	5
<p>The Ground Stability (1:50,000) section includes the BGS Geosure data suite, reporting features to 250m and plotted onto 3 separate maps. Also reported is brine subsidence, brine mining and salt mining data sets, of which Brine Pumping and Salt Mining Related Features are plotted, and subsidence insurance claims and insurance investigations data, which is not plotted.</p>	
Historical Map List	6
<p>The Historical Map List section details the historical mapping that has been analysed for your site, in relation to the Historical Land Use Information sections.</p>

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Natural England Copyright Notice

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

Scottish Natural Heritage Copyright

Contains SNH information licensed under the Open Government Licence v3.0.

Ove Arup Copyright Notice

The Mining Instability data was obtained on licence from Ove Arup & Partners Limited (for further information, contact mining.review@arup.com). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The supplied Mining Instability data is derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

Stantec Copyright Notice

The cavity data presented has been extracted from the PBA (now Stantec UK Ltd) enhanced version of the original DEFRA national cavity databases. Stantec UK Ltd retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by Stantec UK Ltd. In no event shall Stantec UK Ltd or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England. The probability result is only valid for properties above ground. All basement and cellar areas are considered to be at additional risk from high radon levels. If an underground room such as a cellar or basement makes up part of the living or working accommodation, the property should be tested regardless of Radon Affected Area status.

Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

Slice

Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline), that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

Segment

A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

Quadrant

A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.
