

Application for an environmental permit

Part RSR-B4 – New or varied bespoke radioactive substances activity permit (unsealed sources and waste from unsealed sources)

Please read through this part of the form and the part RSR-B4 guidance notes before you fill it in.

It should take less than two hours to fill in this part of the application form.

If you are applying for a new bespoke permit for a radioactive substances activity involving unsealed sources and/or radioactive waste from unsealed sources on a non nuclear site, fill in this part of the form, together with parts RSR-A and RSR-F. Unsealed sources are sometimes known as open sources. If you also want to make on-site disposals of solid waste to land, also fill in part RSR-B5. If you need a permit to store radioactive materials in transit, complete part RSR-B2.

Only fill in the sections relevant to your application. If you are applying to vary (change) an existing permit for sealed sources you should only fill in the sections which cover the changes you are seeking.

For security reasons, do not refer to sealed sources on this part of the form. There is a separate part (RSR-B2) for radioactive substances activities involving sealed sources.
