

Swarbrick Hall Poultry Unit

The installation at Swarbrick Hall Poultry Unit will be able to meet all the new relevant BAT conclusions and the AEL's for broilers.

A nutritional strategy will be employed reducing the levels of N and P

This will be verified by means of manure analysis and reported annually along with dust emissions based on the standard emission factor for broilers.

NH3 emissions will be calculated using the standard emission factors and reported annually.

On a weekly basis, odour levels at the installation will be monitored for high housekeeping odours by persons not directly involved with the poultry.
