## SANDONS FARM RECYCLING FACILITY and LANDFILL SITE

## ENVIRONMENTAL MANAGEMENT SYSTEM

**CHORLEY SAND & AGGREGATES LTD** 

## **SITE SUMMARY**

The site is an active sand quarry which incorporates a closed landfill site within a small area of the site (Sandons Farm Landfill Site). The quarry is being backfilled by inert landfill (Sandons Farm Inert Landfill Site) under an environmental permit number EPR/CB3606CU.

Aggregates recycling is carried out in a designated area under a standard rules permit (SR2010No12) EPR/EB3806TM. A variation to this application to a bespoke permit is pending.

Inert waste material, largely from utility works, will be recycled into useable products. It is envisaged that after depositing waste material at the site for recycling, the driver will back load with aggregates for use eg. as pipe bedding. Products will be produced in accordance with WRAP protocol.
