Hello Mark/Rachel,

We require further information to enable us to duly make this application. Should you need any clarification on the points raised below then please do not hesitate to contact me. Please note that this will be the final opportunity to provide the information required before your application is returned. You will need to provide this information by the 17/04/2024.

1. Emission from head of works waste activity

You have advised that "There is no sampling point for the effluent offloading point. In line with Thames Water's management systems, sampling of tankered wates is undertaken at the tanker, and not at a fixed sampling point. As tankers differ in size and volume, as well as parking in different locations within the offloading area, a single grid reference does not accurately reflect where the samples will be taken from." You have applied to accept 16 10 02 to the head of the works which will be discharged via an emission/transfer point that you will need to sample from in line with section 6.4 of guidance <https://www.gov.uk/guidance/non-hazardous-and-inert-waste-appropriate-measures-for-permitted-facilities/6-emissions-control>. If you do not provide an emission/transfer and sampling point we will not be able to progress this element of your application and you will need to remove this element from your application.

Provide a revised emission point plan which identifies the effluent sampling point/transfer point and emission point for the effluent discharge from the head of works waste activity.

Kind Regards

Sarah Raymond
