Hi Caroline,

Apologies for coming back to you late on in the week but just picking up on the WAMITAB query. Earlier today I discussed this query with Biffa's Project Team since as the future granting of a planning permission for the OWC facility is currently unknown then we wondered if the provision of the WAMITAB certificates with the additional modules are required at this early stage? To provide some further background I have summarised below the estimated timescales for the potential development of the OWC facility and as this could be 18-24 months away, this would allow sufficient time for Lee Coulson to have completed the relevant modules, and we would provide updated TCM details prior to the commissioning of the OWC facility:

OWC facility – Development Timescales:

- The current planning application has been refused so at this stage the development of the area of the site and construction of the OWC cannot be commenced;
- Should Biffa lodge an appeal against the planning refusal this process could take approximately 12-15 months and is subject to Biffa lodging an appeal before March 2025;
- The preparation of the area of the site where the OWC would be constructed and situated requires the removal of soil and involves reprofiling to make a suitable base for the new facility. As advised by Biffa's in house engineering team these works would take 2 months for removal of the soil and 4-5 months for full construction, none of these works would commence until the planning permission has been granted;
- The estimated start date for operations would be 18 – 24 months.

Taking the above into consideration whilst the OWC permitted activity is likely to be included in the varied permit before the outcome of the planning appeal, this activity cannot become operational, as such we would like to agree with the Environment Agency that updated WAMITAB details for the TCM/site management will be provided prior to operations at the site commence.

I am around on Monday if you need to discuss this over the phone.

Many thanks,

Neil

Subject: RE: EPR/AB3700LS/V006 - Biffa - Brookhurst Wood Treatment site - Not Duly Made

Good morning everyone,

I hope you are well. I have tried called Angela and Neil but both are unavailable to speak at the moment.

I'm almost in a position to duly make this application – the only thing which is preventing this is the WAMITAB cover. I have reviewed the qualifications you have provided and cross referenced the modules in them with

those required for the open windows composting course (ref MROC3). There are two modules currently not covered by Lee Coulson's certificates but are required under MROC3. Those are Level 4 for OCS30 (managing operations for OWC of non-haz wastes) and OCS61 (managing the transfer and disposal of wastes arising from OWC operations). Here are a couple of links to the WAMITAB website:

[Qualifications search - CIWM \(WAMITAB\)](#) - (I searched under 'compost).'

[CIWM-Purpose-Statement_V3_MROC3.pdf](#)

I therefore need you to provide me with evidence that you will have this cover by the time this variation is issued. I will duly make this once received. If you could get this to me by 26/11/2024 then I will get the consultations out and begin determination.

I mentioned in my phone message to Angela that there are also a couple of things I should have asked for at duly making but I'm happy to duly make without – as long as you provide me with them within the next couple of weeks. Perhaps a deadline of 29/11/2024 would be acceptable for this? I realised that you have not provided an alternative measures assessments for both biowaste treatment and non-hazardous wastes as is now standard for applications dealing with these activities. Here are the links to the relevant guidance for this:

[Non-hazardous and inert waste: appropriate measures for permitted facilities - Guidance - GOV.UK](#)

[Biological waste treatment: appropriate measures for permitted facilities - Guidance - GOV.UK](#)

In addition, I need an amended C3 application form with all the technical guidance you will adhere to referenced (Table 3) – BAT and appropriate measures. For ease, here is the link - [Part C3 – Variation to a bespoke installation permit](#) . Again, if you can get this to me by 29/11/2024 that would be great.

Many thanks and best wishes

Hi Caroline,

Thanks for the quick reply and agreeing to the extension.

I don't envisage there being any difficulties in getting the response to you either before or by the 8th Nov, but obviously I'll be in touch if required.

Many thanks,

Neil

Good morning, Caroline,

Quick update.

AECOM are working on the drafting of the responses, which I hope to receive tomorrow, however a couple of my colleagues in the Brookhurst Wood operational team are unavailable and on leave part of this week and as there are some details I need to get them to approve would it be possible to further extend the submission date to the end of next week, to the 8th Nov 2024? We will try and get the response to you earlier if we can though.

Hopefully, this is OK with you.

Many thanks,

Neil

Hello Caroline,

It was good to speak with you yesterday and we all found the meeting really useful.

I had another meeting this morning with Angela to discuss the work involved in responding to all of the not duly queries, taking into considering workflow, resource required to prepare, review and finalise the responses, then we would like to request an extension of 3 weeks, with a revised submission date of Friday 1st November 2024. We hope this is acceptable and await your reply.

If you need to discuss anything else related to the application then please do not hesitate to contact me.

Many thanks,

Neil

Subject: EPR/AB3700LS/V006 - Biffa - Brookhurst Wood Treatment site - Not Duly Made

Hi Angela and Neil,

Environmental Permitting (England and Wales) Regulations 2016

Application reference: EPR/AB3700LS/V006

Operator: BIFFA WASTE SERVICES LIMITED

Facility: Brookhurst Wood Aggregate Treatment & Recycling Facility, Langhurstwood Road, Warnham, RH12 4QD

Thank you for your application received on 20/10/2023. In lieu of our planned conversation, below is the list of things which I need to duly make this application.

In order to progress this application, I need the following from you:

1. WAMITAB – the current certificate covers physical waste treatment but is out of date. It also doesn't cover biowaste. Please provide us with evidence your TCM has the correct cover for the composting activity and updated waste treatment qualification. This should be both the original certificate and

current continuing competency certificate.

2. BAT assessment – amend to provide more description to how the site monitors the composting side which meets BAT36. To include monitoring frequencies, trigger points and actions. As per the charging section below, if the waste wood shredding activity is an installation, the BAT assessment must be amended to also include this aspect under the waste treatment BREF. As the shredding is for both the waste wood and composting green wastes, BAT14d must be adhered to regarding enclosure of the shredding activity. Any deviation away must be fully justified and explained how processes on site provide the same protections against dust exiting the site boundary.

3. FPP – as the waste piles of wood exceed the guidance, the FPP must include additional measures, particular in monitoring, to reduce the risk of self-combustion and heat spots in the piles.

4. 19 12 12 – my understanding is that this code will be used in the existing waste treatment activity.

The fact that you have to describe this material (aggregate or glass?) as this waste code suggests that this waste will be contaminated because of where it's come from. Please confirm the origins of this waste type and:

a. It would be really helpful to provide a section in the technical plan just concentrating on this waste code. In it, please include the following:

b. Describe tonnages and whether it will be subject to further treatment when it arrives on site. If it is washed, describe what happens with these wash waters, what's added to them, how the washing process works, what wastes are produced during this process and how it's dealt with.

c. If the aggregate you produce meets a quality protocol, confirm how adding a 19 12 12 waste will meet those requirements. As said above, the expectation is that this waste type is contaminated and is not a code used in the QP.

d. Show where this waste still be stored in a plan – both pre and post treatment

e. Show where aggregate mixed with this waste type is stored in a plan

f. Describe how surface water will not be contaminated with this waste type – where does the water go?

g. If waters which are discharged either to sewer or surface water comes into contact with 19 12 12 wastes, provide a H1 risk assessment. The water quality section of the new H1 is still unavailable, so please use the existing excel spreadsheet version and make any necessary adjustments if out of date.

h. Describe how surface water from areas storing 19 12 12 wastes are prevented from entering the lagoons and any other water used to irrigate the compost. Any water coming into contact with 19 12 12 wastes could potentially but the compost's PAS100 status at risk.

i. Something to consider – if waters which have come into contact with 19 12 12 wastes enters the effluent treatment plant on the other site prior to discharge, then it is likely that the permit for that site will need to be varied accordingly.

5. Site plans – make clear on one of the infrastructure drawings the areas where the mobile crusher will be placed. If it is to move to different parts of the site, then this should be shown clearly on a plan.

6. Site plan ref BA236100 – The surface water storage tanks to the north appear to be within the permit boundary of the landfill – please confirm if this is the case and describe how this is managed between the two permits in an amendment to the technical plan.

7. Site plan – provide a drawing which clearly shows where all water goes (clean roof water, contaminated yard water and process waters) – whether to lagoons, to surface water or discharged to the MBT. Please include the storage of 19 12 12 wastes so we can clearly see where run off which is in contact with this goes.

8. Provide a process flow chart showing relationship between this site and the MBT next door (eg: in terms of water treatment and whether any wastes go from one to the other).

9. Drainage – in the technical plan, describe why this site cannot treat the waters before they exit the site boundary en route to the MBT next door for further treatment. It looks like there are linked between the two sites so we are wanting to understand them better.

10. Lagoons and new water storage – it looks like these are all new infrastructure proposals. Please confirm in the technical plan the standards used to which they will be constructed, and include details

of how they will meet containment requirements under CIRIA.

We also need additional fees in order to duly make this application and the amount will depend on your answers to my email dated 12/09/2024 in relation to the waste wood shredding. The additional fee will include:

Waste wood storage and shredding – this will be a new activity, however the purpose behind the shredding will dictate how much is due. The C4 form does say that the site is treating up to 400 tpd waste wood for recovery. If that recovery is pre-treatment for incineration/co-incineration at over 75 tpd, then this will be an installation. So, this activity fee will either be:

- i. 5.4(a)(iii) and b(iii) – non-hazardous pre-treatment for incineration or co-incineration - £13,288 ([1.16.2.3](#) of the charging guide), or
- ii. If the waste wood shredding remains a waste activity, then the fee to cover this is £7,930 under 1.16.12 physical treatment of non-hazardous waste. This is because it is entirely unconnected with existing activities and the proposed new activities so a full assessment of risk is required.

In addition, due to the nature of 19 12 12 code, we will need to look more closely at this so a fee for a normal variation against the physical treatment of non-hazardous waste activity is required as a minimum. This will be £3,965 as per 1.16.12 of the charging guide.

Please reply directly to this email with your information. You must send us the information and payment by 11/10/2024.

Details of how to pay are given in Part F of the application form.

If we do not receive this by this deadline we will return your application.

If we receive what is missing by the deadline, we will continue to check your application. We'll check to see if there's enough information for the application to be 'duly made'. Duly made means that we have all the information we need to begin determination. Determination is where we assess your application and decide if we can allow what you've asked for.

We'll let you know by email whether your application can be duly made. If it can't be duly made, we'll return your application to you. If we do have to return your application we'll send you a partial refund of your application payment. We'll retain 20% of the application charge to cover our costs in reviewing your application. This maximum amount we'll retain is capped at £1,500. Further information on charging can be found at: <https://www.gov.uk/government/publications/environmental-permits-and-abstraction-licences-tables-of-charges>

Note: Our email system has a file size limit of 25MB, if your returns exceed this limit you will have to arrange an online file transfer. Please ensure the file transfer link does not have a time limit on it.

If you have any questions please contact me directly using the details below.

Yours sincerely,

Caroline Braysher

Hi Neil,

I was going to cover both parts of the site is possible. Chat would include how water is currently managed on site, and proposed changes, a chat about the aggregate processing side (eg: does the treatment on site meet the quality protocol), waste code additions etc...

I will send you my not duly made email so that might help you see the direction of my thoughts – you'll have it by the end of this week.

My availability for next week:

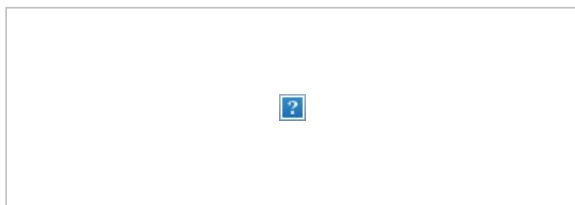

Monday 30th Sept – 1-3pm
Weds 2nd Oct – morning

It's a bit tight but hopefully you can find a time to suit.

Best wishes

Hello Caroline,

Next week might be better, I am hoping to speak with the General Manager in our Organics Dept today/tomorrow. If you could send across some further dates that would be really helpful.

Just in terms of our chat, are we looking to focus more so on the new Open Windrow Composting Facility as opposed to the existing Aggregate Treatment & Recycling Facility (ATRF)? The reason for asking is the ATRF is operated by another dept in Biffa so I want to make sure we have the correct people available.

Many thanks,

Neil

Good morning everyone,

I'm in the process of duly making this application and have a couple of questions regarding the waste wood shredding activity.

Please can you confirm the purpose behind the shredding of the non-hazardous waste wood? As this is not a DAA to the composting activity nor linked to the existing activity, this will be charged as a new activity in addition to what has already been paid. So the charging question is whether to charge as a new waste physical treatment activity or a new installations activity. However, whether it comes under installations or not in its own right depends on the purpose behind it and treatment tonnages. So, if the wood shredding is pre-treatment for incineration and is over 75 tonnes per day, then it's an installation activity. Similarly, if the shredding is a disposal operation rather than recovery and is over 50 tonnes per day treatment, then it's also an installation activity. If not, it remains a new waste physical treatment activity.

I've been looking through the documentation submitted and haven't yet come across the purpose for the waste wood shredding so thought I'd ask the question now.

I'm still going through everything so I will send the formal correspondence in due course – it will be a not duly made since at the least we need the extra fee, but I just need to see whether we need more information too.

Many thanks and best wishes

Caroline,

Thanks for the update – I have copied my colleague Caroline Braithwaite and the Operator contact Neil Sumner, if you can copy them in on future correspondence that would be appreciated as I will have leave coming up in September and it means any clarifications you may need will get picked up during that period.

In the meantime, I am not aware of anything that has changed with the application proposal - [@Neil Sumner](#) can you just confirm that is correct.

Regards
Angela

Subject: EPR/AB3700LS/V003 - Biffa - Brookhurst Wood Treatment site

Dear Angela,

EPR: EPR/AB3700LS/V003 (EAWML 400796)

Operator: Biffa Waste Services Limited

Site: Brookhurst Wood Aggregate Treatment & Recycling Facility, Langhurstwood Road, Warnham, RH12 4QD

I have just tried calling you to introduce myself but was unable to speak with you.

I have been allocated the determination of this substantial variation. I've not yet looked at it but will begin to do so today. I'm on leave for a fortnight after today, however will continue my duty making checks upon my return.

In the meantime, as I see this has been on the queue a long time, I would like to ask whether anything has changed in relation to this application? If there is anything you would like to update me on, just drop me a line.

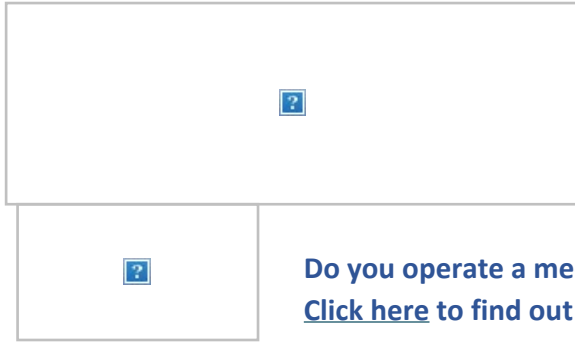

I'll be in touch again once I return from holiday.

Best wishes

Caroline Braysher

Any business communication sent by these companies (together "Biffa") is confidential and may be legally privileged or otherwise protected. If you receive such a communication from Biffa in error, please inform us and then delete it immediately from your system. You should not copy it or disclose its contents to anyone. Please be aware that messages sent to and from Biffa may be monitored for reasons of security, to protect our business, and to ensure compliance with legal and regulatory obligations and our internal policies. Emails are not a secure method of communication, can be intercepted and cannot be guaranteed to be error free. Anyone who communicates with us by email is taken to understand and accept the above. Whilst Biffa takes reasonable precautions to prevent computer viruses, we cannot accept responsibility for any loss or damage arising from the use of this email or attachments or any viruses transmitted to your computer. It is recommended that you should carry out your own virus checks before opening any attachments.

For details of how we deal with your personal data please visit our website at <https://www.biffa.co.uk/privacy-statement>

Any Biffa purchase order contained in this email is subject to the relevant (by reference to the Goods or Services being purchased) Biffa Procurement General Conditions of Purchase ("BPGCP") which can be found on Biffa's website at <https://www.biffa.co.uk/privacy-statement> and the terms of which apply to the purchase order to the exclusion of any other terms as stated in those BPGCP.
