Hi Laura,

Thanks for your patience on this.

I can confirm the following:

- Power consumption of the installation = 0.35MW  
This comprises 0.25MW of electricity from the National Grid and 0.10MW equivalent from the combustion of diesel.
- Thermal input of the boiler = 0.97MW

Regards,

Paul

Hi Paul,

Thank you for talking to me just now.

Please can you confirm the energy consumption of the installation in Mega Watts (MW), including both electricity from the National Grid and the diesel fuel used to power the boiler. In addition, please can you confirm the thermal input of the boiler (MWth).

Many thanks,  
Laura
