

About this consultation

S25 3QS, Arundel Motors Limited: environmental permit consultation

The aim of this consultation is to ask whether you have any comments relevant to the permit application

We want to make the best decision when permitting. Listening to the views of others helps us to take account of concerns, or local environmental factors, that we may not be otherwise aware of.

We are seeking comments on the application for Pattemore's Transport (Crewkerne) Limited. Please use the reference number below when making comments on this application.

- Permit Number: EPR/EP3227SQ/A001
- Regulated facility type: Arundel Motors Ltd (operating as H. Askey) are a Haulage and warehousing company based at Dinnington, Sheffield. They operate approximately 30 vehicles and are accredited under the ORS and Earned recognition schemes. They wish to be able to operate an activated carbon emptying and waste storage facility on site

The site offers 500sq feet indoor storage and extensive concrete outdoor storage solutions with CCTV.

These spent carbons are currently transported to 1 of 2 CPL partners licensed WTS. Here the vessels are emptied using a Disab into 1Tonne FIBC (a fully contained process). This is to facilitate handling. The 1Tonne FIBC containing spent carbon are then transported to a licensed warehousing or WTS or sent direct for reactivation at the Immingham facility.

- Regulated facility location: Arundel Motors (H Askey Transport), Monksbridge Rd, Sheffield, S25 3QS

Non-Technical Summary

Refer to the non-technical summary which explains this application, in non-technical language.

This should include a summary of the regulated facility, the key technical standards and control measures arising from the risk assessment.

What the response will be used for

We will take your consultation responses into consideration as part of our determination of the permit. If we decide to grant the permit we will explain how we made our decision and how we have addressed the concerns that were raised.

We will only issue a permit if we believe that harm to the environment, people and wildlife will be minimised and that the operator has the ability to meet the conditions of the permit. Providing a business can prove that the proposed activities meets all the legal requirements, including environmental, technological and health requirements, then we are legally obliged to issue a permit, even if some people do not approve of the decision.
