

IN CASE OF CHEMICAL / ACID SPILL OR LEAK

Alert Site Management and evacuate the immediate area.

Warn others of the spill / leak and ensure they don't enter the area.

Cordon off the area if necessary / safe to do so.

Do not contaminate yourself.

Assess the potential degree of risk to members of staff and take appropriate action (Site Management).

Avoid breathing fumes and wear full protective clothing where required.

Follow the instructions for handling the chemical spillage (if safe to do so).

Wash your hands / person thoroughly if cleaning up the spillage.
