

Complaint Form – Guy & Wright Ltd

The current permit (EPR/PP3793EU/V005) permits a non-IED Installation for an Anaerobic Digestion facility (under 100 tonnes/day), with the treatment of animal wastes limited to less than 10 tonnes/day. Storage of digestate is also permitted via on-site lagoons and biogas is burnt in 3 Combined Heat and Power Engines (CHPs). The resultant heat from this process is used within neighbouring commercial greenhouses. Waste types accepted are primarily organic wastes from the European Waste Catalogue Chapter 02 and Chapter 19.

The variation seeks to:

- Vary from a non-IED waste anaerobic digestion facility to an Installation activity under Schedule 1, Section 5.4 Part A (1) (b), Recovery or a mix of recovery and disposal of non-hazardous waste with a capacity exceeding 100 tonnes per day if the waste treatment activity is anaerobic digestion, involving one or more of the following activities: i) biological treatment.
- Remove the daily tonnage limit on processing animal wastes so the site can accept and process more than 10 tonnes /day.
- Add two further digestate storage lagoons and associated boundary extension.
- Add a fourth Combined Heat and Power Engine ('CHP').
- Regularise within Table S1.1 relating to emission point A1 and A2. This is reflective of infrastructure that has been historically removed and replaced.
- Regularise Table S3.1 to correct the existing lagoon capacity. This should read 11,000m³ as opposed to 10,000m³.

The application has been prepared by Wisser Environment Limited on behalf of the applicant Guy & Wright Ltd.
