Dear Mr Dunn,

Environmental Permitting – Recovery or Disposal Operation

Pre-application Reference: EPR/JB3102FY/A001

Proposed Operator: Wexham Park Golf and Leisure Centre Limited

Site Address: Wexham Park Golf Club, Bell Farm, Wexham Park Lane, Wexham, SL3 6LX

As part of our pre-application discussions, you have submitted information to us that includes your assessment that the activity you wish to undertake at your site amounts to a recovery operation.

We have now fully considered your submission and we would like to advise you that:

We agree with your assessment that your activity is a recovery operation. This advice is based on the information you have provided in relation to waste types, amounts and nature of proposal including any proposed landform. If you change any of these between now and when you submit an application form, this advice may no longer apply. **Please also note that following submission of an application, additional assessment will take place (for example, further assessment of the proposed waste types based on the sensitivity of the site location) and therefore agreement that an operation is a recovery activity does not guarantee that a permit will be granted or a variation issued.**

For the sake of clarity, the following documents are considered to form the approved waste recovery plan;

- Document Titled '183239 WRP FINAL 210220 REVB COMP.pdf'
Waste Recovery Plan - Import of materials for the capping and regrading of Wexham Golf Club
Revision B
21st February 2020

The following information is **not** considered to form part of the approved waste recovery plan;

- GEOTECHNICAL ASSESSMENT OF SPECIFICATION COMPLIANCE AND SUITABILITY FOR USE IN ENGINEERING WORKS
Report No 34186DP/IST0119

If you have any questions please phone me or email rachel.mills@environment-agency.gov.uk

Yours sincerely

Rachel Mills

Permitting Officer
