| → | EMPTY DUCT |

NOTES:

This survey has been carried out to the standard, as described by The Survey Association (ISA), for a Level 4 Survey.

Utilities on this drawing have been detected using non-invasive technologies. The performance of these technologies can be adversely affected by ground conditions, which one of the contractors of Brunel Surveys. Consequently some utilities may be undetectable and therefore, whilst Brunel Surveys uses best endeavours to detect all utilities we cannot guarantee that 100% detection can always be achieved.

Irrespective of the information provided by a utility survey and statutory plans, any groundworks should be undertaken with extreme caution and in accordance with health and safety executive guidance and 47 AVOIDING DANGER FROM UNDERGROUND SERVICES
