

About this consultation

SO21 3QS, FORTIS IBA LIMITED: environmental permit consultation

The aim of this consultation is to ask whether you have any comments relevant to the permit application

We want to make the best decision when permitting. Listening to the views of others helps us to take account of concerns, or local environmental factors, that we may not be otherwise aware of.

We are seeking comments on the application for FORTIS IBA LIMITED. Please use the reference number below when making comments on this application.

- Permit Number: EPR/FB3805GN/V006
- Regulated facility type: The proposals include the deconstruction and removal of the existing incinerator bottom ash (IBA) processing plant and the construction of a new, replacement plant (replant), within the current permit boundary.

In addition, a new enhanced IBA recovery facility is to be installed at the Site, which will be located within a fully enclosed building, outside of the current permit boundary. The enhanced IBA recovery facility will further refine the non-ferrous fraction produced from the replant; as well as imported non-ferrous metals from the other Fortis sites. The plant shall be comprised of a material receipt, storage area and dry and wet separation plants. Recovered IBA residue will be returned to the adjacent IBA recycling plant for use in the IBAA.

- Regulated facility location: A303 IBA Facility, Drayton Road, Andover, SO21 3QS

Non-Technical Summary

Refer to the non-technical summary which explains this application, in non-technical language.

This should include a summary of the regulated facility, the key technical standards and control measures arising from the risk assessment.

What the response will be used for

We will take your consultation responses into consideration as part of our determination of the permit. If we decide to grant the permit we will explain how we made our decision and how we have addressed the concerns that were raised.

We will only issue a permit if we believe that harm to the environment, people and wildlife will be minimised and that the operator has the ability to meet the conditions of the permit. Providing a business can prove that the proposed activities meets all the legal requirements, including environmental, technological and health requirements, then we are legally obliged to issue a permit, even if some people do not approve of the decision.
