

By-products Destinations

The following by-products and their outlet destinations are contained below:

By-product	Destination	Council Directive 2008/98/EC classification.
Digestate	Proportion recovered to feed digester.	Recovery
Digestate	Landspreading for agricultural benefit.	Recovery
Bio-gas	Supplied to gas engine for electricity generation.	Recovery
Wastewater	Wessex Water Sewerage Treatment Plan.	Disposal

Wastewater from the process is mixed with wastewater from the factory prior to being sent to Wessex Water. The post AD plant wastewater is lower in COD/BOD than the factory water and therefore reduces the overall COD/BOD loading on the sewerage treatment works.
