

10.25 BV Dairy H1 Tool v9.2 - Oct 25 Narrative

The H1 tool has been ran using air emissions data from the Air 1 forms submitted annually as required by the permit. Data has been averaged from forms provided for 2024 and 2025 and further back to 2016 where VOC results were available.

The results show that other than Oxides of Nitrogen, all determinants were screened out in Test 1. Oxides of Nitrogen were subsequently screened out in Test 2.
