

Meadowlands Poultry Unit

The installation at Meadowlands Poultry Unit will be able to meet all the new relevant BAT conclusions along with the new BAT AEL's.

BAT 3,4 - A nutritional strategy will be employed reducing the levels of N and P

BAT 24 - This will be verified by means of manure analysis and reported annually

BAT 27 - Dust emissions based on the standard emission factor for broilers.

BAT 25 - NH₃ emissions will be calculated using the standard emission factor and reported annually.

BAT 32 – Forced ventilation system with non leaking drinker system, new housing fitted with air scrubbing systems as well as one existing house.
