Hi Steve,

Can you amend any relevant docs to reference the addition of the heat exchangers please, i.e non-tech summary, tech standards, proposed changes, site condition report etc.

We are just reviewing the modelling for duly making so I will confirm once this has been completed.

Kind regards
Kate

Hi Kate

Operator has just informed me that heat exchangers are being fitted to the existing six houses. These are the Big Dutchman Erny heat exchangers, they are dry cartridge filter type and do not produce condensate. The dirty water line from each heat exchanger into each poultry house is for the terminal cleaning during site washdown. Have attached the manual for the heat exchanges and an amended site plan. Please let me know if you need any additional documents amended.

Regards

Steve
