Hi Andrew

Apologies about this, as discussed operator has applied for planning for the site for a total of 300,000 broiler places in six poultry houses, a new site boundary and location map is being done as we speak and I will email over as soon as I receive it.

All the houses will have scrubbing systems on them which reduce NH3 by 90%.

I will redo all the relevant documents and get them to you as soon as I can.

Regards

Steve
