Hi Andrew

Please see response from planning consultant in respect of point 1, there was no stipulation in respect of odour.

Regards

Steve

Steve

The LPA did not have a specific standard for ammonia removal or specific concentration levels post scrubber. The LPA required the process contributions at nearby nationally and internationally protected ecological sites to be 'insignificant' meaning below 1%.

Regards.

Hi Ian

I know we spoke on this yesterday, could you do a statement for the following please

A statement of whether the relevant council required a specific standard /criteria of ammonia/odour removal and specific absolute concentration levels post scrubber. If this information has been laid out, please provide these criteria.

Regards

Steve
