Thanks Brian

Any chance of the two documents in German being translated?

Regards

Steve

Subject: Odour reduction

Hi Brian

EA have asked for info on the level of odour reduction the scrubbing system gives for Rodenhurst Hall, can you send please.

Looking at converting our other flat deck free range house to Aviary system.

Shed size overall is 44.3m x 21.23m, it is a double span building with a row of posts in the middle, the spans are not equal so will get some accurate measurements for each span.

Egg collection and litter belts at same end, single phase power.

Regards

Steve
