---

Hi Steve,

Thanks for the revised modelling report and files. We are just waiting for a response to question 13 wrt the ammonia scrubbers now so I will pick that up when I return from leave.

Can you just amend the technical standards document, and your response submitted 15/10/24, please, which refer to scrubbers and HV fans all having an efflux velocity of 12m/s, as the modelling is based on scrubbers at 12m/s but HV fans at 11m/s.

I will be back from leave on 29/10/24. If you have any questions in the meantime can you contact Kate Cummins please and copy me in.

Kind regards  
Kate
