

Application for an environmental permit

Form RSR-C3 – Variation to a bespoke radioactive substances activity permit (nuclear site, unsealed sources and radioactive waste)

Environment
Agency

Please read through this part of the form and the form RSR-C3 guidance notes before you fill it in.

It will take about 2 hours to fill in this form.

Fill in this part of the form, together with forms RSR-A and RSR-F, if you are applying to vary (change) the conditions or any other part of your permit, except those relating to on-site disposals of solid waste to land.

If you want to vary (change) the conditions relating to an existing disposal facility for solid radioactive waste, fill in form RSR-B5.

If you are applying to add an on-site radioactive waste disposal facility to a nuclear site that is already permitted, use form RSR-B5. If you wish to add other types of on-site radioactive waste disposal to a nuclear site permit (for example, in-situ disposal or disposal for a purpose), use form RSR-C5 (in preparation). You only need to give us details in this application for the parts of the permit that will be affected (for example, if you are adding a new radioactive substances activity or making changes to existing ones.)

For security reasons, do not refer to sealed sources on this part of the form. There is a separate form (RSR-C2) to vary permits for radioactive substances activities involving sealed sources.
