6th August 2025

For the attention of (removed)

Dear (removed)

FOR ASSESSMENT: Variation 13 of the Hinkley Point C construction water discharge activity permit EPR/JP3122GM

Please find attached an application to vary the Hinkley Point C Construction Water Discharge Activity (CWDA) permit EPR/JP3122GM to variation 13.

Summary of variation:

- Addition of ammoniated firewater from the site fire hydrant network for testing purposes.
- Addition of Activity J to the existing permit which will allow the discharge of the low-risk effluents generated as part of cold commissioning activities, including:
 - flushing and hydrotesting wastes, specifically the commissioning effluents not containing hydrazine and ammonia but potentially containing ethanolamine and trisodium phosphate at concentrations below those previously assessed as part of Variation 10 (Activity J(i)); and
 - the effluent from the site demineralised water plant (Activity J(ii)).
- Change of the discharge pattern from a pulsed discharge to a continuous discharge for Activities I and J.

Should you have any questions or comments we will be happy to provide further information on this as part of our ongoing Level 4 interactions.
