

9922307201B- Process Flow – Rev 0

Material Type: C&D
 Bulk Density: 450 kg/m³ (loose material)
 Throughput: 50 tonnes per hour
 Operating Hours: 8 hours/1 shifts/5 days/50 wks = 2,000 hrs/year

Grain size distribution and composition to be confirmed subject to material sample analysis.
 Maximum amount of dust in the input material must not be >3%

Moisture Content: Material must be hand dry

Assumed grain size distribution (% by weight)
Assumed:

<10mm	15%
<50mm	30%
<300mm	100%

Input composition (% by weight) Assumed:

Hardcore	30%
Fines	15%
Wood	10%
Metals	5%
Plastics	5%
Residue	10%
Lights	25%
