APPENDIX I      DRAWINGS  
APPENDIX II    ENVIROCHECK REPORT

## ACRONYMS / TERMS USED IN THIS REPORT

ASCR	Application Site Condition Report
BGS	British Geological Survey
DES	Deep Eutectic Solvent
EA	Environment Agency
EC	European Commission
ECL	Environmental Compliance Limited
EMS	Environmental Management System
EP	Environmental Permit
EP Regulations	Environmental Permitting (England and Wales) Regulations 2016 as amended
ERA	Environmental Risk Assessment
EU	European Union
IED	Industrial Emissions Directive
MAGIC	Multi-Agency Geographic Information for the Countryside
OS	Ordnance Survey
PHE	Public Health England
RHS	Relevant Hazardous Substance
SPZ	Source Protection Zone
The Installation	DESCycle solvent based metal recovery plant
The Site	Wilton Centre, Redcar, TS10 4RF
VOC	Volatile Organic Compound

## 1. SITE DETAILS

### 1.1. Context and Objectives of Site Condition Report

1.1.1. Environmental Compliance Limited ("ECL") have been commissioned by DEScycle to prepare an Application Site Condition Report ("ASCR") to form part of the Environmental Permit ("EP") application for their solvent based metal recovery installation, hereafter referred to as "the Installation", located at the Wilton Centre, Redcar, TS10 4RF ("the Site").

1.1.2. This report has been produced in accordance with Version 3 of the Environment Agency's ("EA") Site Condition Report template '*Guidance for applicants H5: site condition report – guidance and template*'.<sup>1</sup> The aim of the ASCR is to describe the condition of the land at the site and to identify any substance in, on, or under the land that may present a pollution risk.

1.1.3. The ASCR, therefore, sets out the initial (i.e., current) condition of the site and considers any pollution incidents that may have occurred at the site and details of any measures put into place to mitigate the effects of any such incidents. It serves two main purposes:

- firstly, it will act as a reference point, along with operating records, for measuring any deterioration of the site whilst operating under the permit (on surrender of the permit, another site report must be prepared, identifying any changes to the condition of the site from that described in the original report); and
- secondly, the ASCR will give information on the physical attributes and vulnerability of the site; it will assist in understanding the environmental setting of the site, and understanding the nature, extent and behaviour of any contaminants that may be present; local hydrology, hydrogeology, geology and general setting are considered.

### 1.2. Name of the Applicant

1.2.1. The applicant is Argo Natural Resources Limited (11151531) trading as DEScycle.

1.2.2. Pre application advice from the EA was received on the 6<sup>th</sup> of March 2025, following a Microsoft Teams meeting held on 4th March 2025. A copy of this advice has been provided as part of this application submission.

### 1.3. Installation Location

1.3.1. The Installation is located at the Wilton Centre, Redcar, TS10 4RF ("the Site"). The Installation covers an area of approximately 0.2 hectares.

1.3.2. The Site Location Plan (DESC.01.01-01) details the Environmental Permit Boundary (outlined in green) and is provided in Section 3 of this application submission.

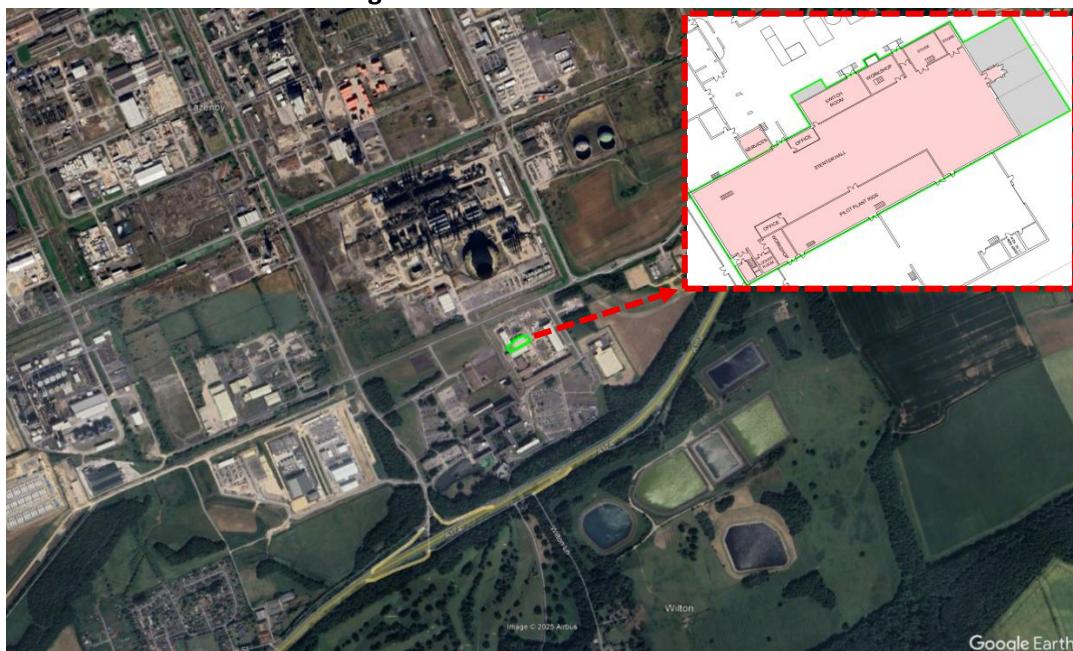

<sup>1</sup> EA '*Guidance for applicants H5 site condition report – guidance and templates*', available at: <https://www.gov.uk/government/publications/environmental-permitting-h5-site-condition-report> updated May 2013, accessed August 2025.

1.3.3. The following drawings have been prepared for the EP submission and are included in Appendix I of this ASCR:

- Site Location Plan – DESC.01.01-01
- Site Layout Plan – DESC.01.01-02
- Sensitive Receptor Plan – DESC.01.01-03
- Fire Prevention and Mitigation Plan – DESC.01.01-04
- Drainage Arrangements – DESC.01.01-05

1.3.4. Figure 1 provides the indicative location of the Installation (red outline) within the context of the surrounding environment.

**Figure 1: Indicative Site Location**

1.3.5. The immediate surroundings encompassing the Installation are made up of industrial and commercial activities. The wider site setting consists of Wilton Industrial Estate to the north and northwest, housing within 1km to the south and southwest and a golf course, reservoirs, open countryside and farmland within 1km to the east and south of the EP boundary.

1.3.6. The Lower River Tees and the North Sea are sited approximately 4.7km northwest and 5km north to northeast of the Installation, respectively.

## 2. CONDITION OF LAND AT PERMIT ISSUE

### 2.1. Environmental Setting

#### Geology

2.1.1. The British Geological Survey (“BGS”) Geoindex Onshore mapping tool<sup>2</sup> indicates superficial deposits underlying the site and surrounding land comprise of Devensian Till (Diamicton) which formed between 116 and 11.8 thousand years ago during the Quaternary period. The permeability of the superficial deposits is described as generally low.

2.1.2. The British Geological Survey (“BGS”) records the underlying geology as superficial deposits underlain by the Redcar Mudstone Group, which formed between 201.3 and 182.7 million years ago during the Early Jurassic period. The permeability of the Mercia Mud-stone Group is described as very low to low.

2.1.3. The BGS Estimated Soil Chemistry average concentration values, as reported within the Envirocheck report contained in Appendix II are as follows for locations within the Installation’s boundary:

- arsenic: <15 mg/kg;
- cadmium: <1.8mg/kg
- chromium: 60 – 90 mg/kg;
- lead: <100mg/kg; and
- nickel: 15-30mg/kg.

2.1.4. According to the Mining Remediation Authority Map Viewer<sup>3</sup>, there is no indication of mining activity at the Installation.

2.1.5. According to the Radon Affected Area mapping tool<sup>4</sup> for the UK, produced by Public Health England (“PHE”), the Installation is located in an area with the lowest band of radon potential with less than 1% of properties above the action level.

#### Hydrogeology

2.1.6. The Multi Agency Geographic Information for the Countryside<sup>5</sup> (“MAGIC”) online tool and the Envirocheck Report (see Appendix I) indicate that the Installation is located on a Secondary Aquifer (undifferentiated) and is located within a low groundwater vulnerability area. Undifferentiated is assigned in cases where it has not been possible to attribute either category A or B to a rock type. In most cases, this means that the layer in question has previously been designated as both a minor and non-aquifer in different locations due to the variable characteristics of the rock type.

<sup>2</sup> British Geological Survey Geology of Britain Viewer. Available online at <https://mapapps2.bgs.ac.uk/geoindex/home.html> accessed August 2025.

<sup>3</sup> Mining Remediation Authority Map Viewer, available online at: <https://datamine-cauk.hub.arcgis.com/> <https://mapapps2.bgs.ac.uk/geoindex/home.html> accessed August 2025

<sup>4</sup> Radon Affected Areas Mapping Tool. Available online at <https://www.ukradon.org/information/ukmaps>, <https://mapapps2.bgs.ac.uk/geoindex/home.html> accessed August 2025.

<sup>5</sup> Multi Agency Geographic Information for the Countryside tool, available online at: <https://magic.defra.gov.uk/MagicMap.aspx> <https://mapapps2.bgs.ac.uk/geoindex/home.html> accessed August 2025

2.1.7. There are no groundwater abstraction licences recorded within 1.5km of the Installation, with the nearest sited approximately 1.9km north-northeast of the Installation (refer to the Envirocheck report in Appendix I for further details).

2.1.8. According to the MAGIC portal, the Installation is not located on a Source Protection Zone ("SPZ").

### Surface Waters

2.1.9. The nearest major water course is the River Tees, located approximately 4.7km to the northwest of the Installation. The River Tees is heavily modified and stretches approximately 137km in length and flows from the North Pennines eastwards to meet the North Sea between Hartlepool and Redcar. The Tees waterbody is classified as being of moderate ecological potential and possesses a poor chemical status<sup>6</sup>.

2.1.10. As shown on the EA's mapping service for flood risk from rivers or the sea<sup>7</sup>, the Installation is not covered by a flood risk category for rivers or the sea and is therefore deemed to have a very low probability of flooding (meaning that the potential of flooding is less than 0.1% each year).

2.1.11. As shown on the EA's mapping service for flood risk from surface waters<sup>4</sup>, the Installation is covered by a low chance of flooding (meaning that the potential of flooding is between 0.1% to 1% each year).

2.1.12. Figures 2 and 3 have been provided to reproduce the information displayed via the EA's mapping service for rivers and the sea and for surface waters, respectively. In Figures 2 and 3, the approximate location of the Installation has been outlined in red.

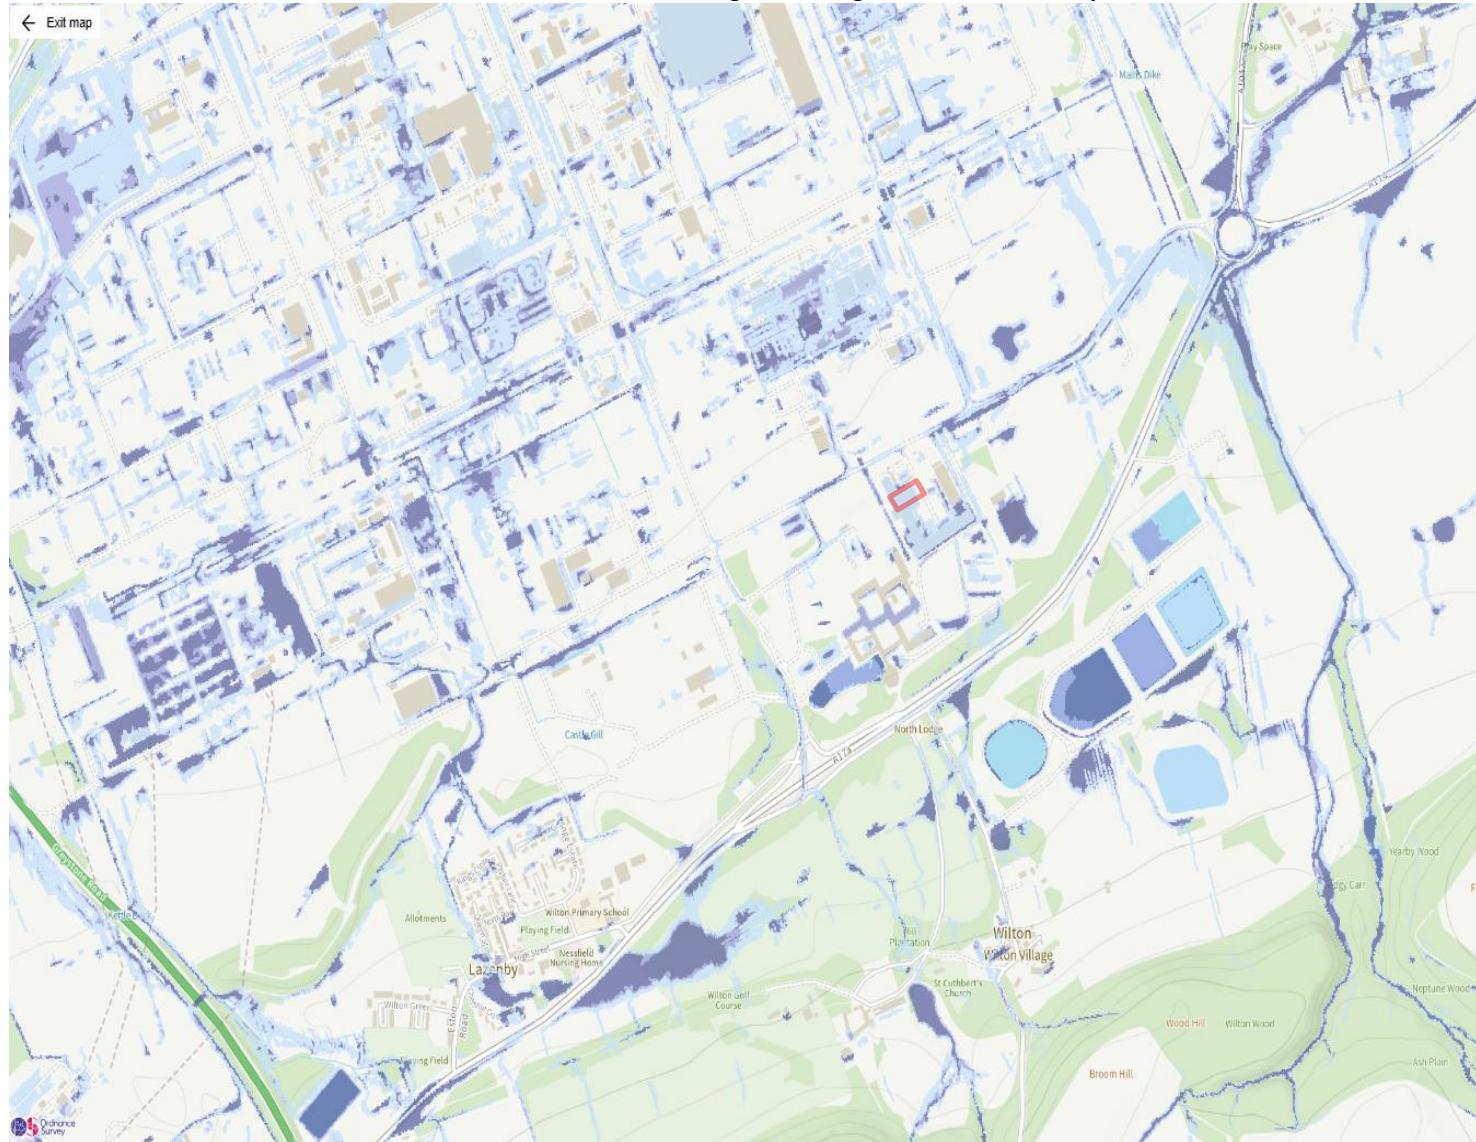

<sup>6</sup> EA's Catchment Data Explorer, available online at: <https://environment.data.gov.uk/catchment-planning/WaterBody/GB510302509900?cycle=3>

<sup>7</sup> EA's Long Term Flood Risk Map, available online at: <https://check-long-term-flood-risk.service.gov.uk/map>

**Figure 2: Long Term Flood Risk Map – Rivers and Seas**

Figure 3: Long Term Flood Risk Map – Surface Water

## Surface water map

### Yearly chance of flooding

#### Extent

- High chance  
More than 3.3% chance each year
- Medium chance  
Between 1% and 3.3% chance each year
- Low chance  
Between 0.1% and 1% chance each year

2.1.13. There are 2 Discharge Consents within 1km of the Installation, as detailed within the Envirocheck report (see Appendix II). Of the listed Discharge Consents, one relates to a trade effluent and the other to a domestic residence.

## 2.2. Pollution History

### Historic and Existing Activities

2.2.1. A review of the Ordnance Survey (“OS”) maps from 1857 to 2025 has been undertaken for the Installation and surrounding area and the findings are presented in Table 1. The OS maps are contained within the Envirocheck Report for the proposed Installation, which is provided in Appendix II of this ASCR.

2.2.2. It is not the purpose of this section to provide a comprehensive account of development history but only to detail those factors that are or could be relevant to the potentially contaminative history of the site and surroundings.

**Table 1: Historical Review**

Date	Scale	The Installation	Surrounding Area
1857	1:10,560	Town Farm.	The surrounding land is predominantly agricultural. Wilton and Lazenby villages are located approximately 1km southeast and 1.2km southwest, respectively with main roads connecting these.
1895	1:10,560	No change.	Kirkleatham village appears to expand its boundary.
1919	1:10,560	No change.	Lazenby saw mill appears to the southwest.
1953	1:10,000	No change.	Wilton Works appears to the northwest of the Installation. A spring is marked at Wilton Grange to the northwest.
1969	1:10,000	No change.	Incomplete data.
1975	1:10,000	No change.	Russian military map depicting an expansion of Wilton works to the northwest. Buildings present in the area to the south of the Installation and reservoirs to the southeast. Roundabout present to the northeast.
1976	1:10,000	No change.	Expansion of reservoir to the southeast of the Installation Additional roads present to the west.
1981-1985	1:10,000	No change.	Further expansion of Wilton Works to within close proximity to the north of the Installation. Further reservoir expansion the southeast. Building to the southwest of the Installation and Lazenby expands. Wilton Golf course is marked to the southwest.
1991	1:25,000	No change.	Russian military map, no significant change.
1991-1992	1:10,000	Building as today.	No significant changes observed.

**Table 1: Historical Review (cont.)**

Date	Scale	The Installation	Surrounding Area
2000	1:10,000	No change.	Expansion of Wilton Works to the northwest.
2006	1:10,000	No change.	No significant change observed.
2025	1:10,000	No change.	Industrial buildings present to the west and southwest Additional housing present in Kirkleatham village.

### **Waste Sites Including Landfill Sites**

2.2.3. According to the Envirocheck report (see Appendix II), there are no BGS Recorded Landfill Sites or historical landfill sites recorded within 1km of the Installation. Although there are no BGS Recorded Landfill Sites or historical landfill sites listed in the Envirocheck report, the Envirocheck report states there are two licensed waste management facilities within 1km of the Installation, permitted by the Environment Agency. Both are industrial waste landfills. The closest is located 496m southwest from the Installation boundary, according to the coordinates specified in the Envirocheck Report. The licence was issued on the 20<sup>th</sup> of October 1978 and the site was a permitted landfill for industrial waste (the licence status is now 'closure').

### **Pollution Incidents**

2.2.4. The Envirocheck report contained in Appendix II lists 0 recorded pollution incidents to controlled waters within 1km of the EP boundary. The Substantiated Pollution Incident Register lists two incidents. Incident reference 817046 occurred on 27<sup>th</sup> August 2010 and is listed as a significant incident category 2 to air with the pollutant listed as "Atmospheric Pollutants And Effects: Chemical Odour". The second incident referenced 1517389 occurred on 21<sup>st</sup> April 2017 and is listed as a significant incident category 2 to land with the pollutant listed as "Specific Waste Materials: Other Specific Waste Material".

### **On-Site Potential Pollution Impacts**

2.2.5. As identified from a review of the Envirocheck report data, potential on-site pollution may have occurred as a result of the site's close proximity to industrial installation sites.

### **Off-site Potential Pollution Impacts**

2.2.6. There are two active permitted EA Integrated Pollution Prevention and Control sites within 1km of the Installation. One of which is an incineration activity and the other a petrochemical site.

2.2.7. There is one active permitted Local Authority Pollution Prevention and Control site within 1km of the Installation, this site is described as Coal, coke and coal product processes.

2.2.8. All of the regulated sites by either the Environment Agency or the Local Authority will have to follow their sector specific process guidance notes, along with having strict emission

limits, monitoring and adhere to Best Available Techniques.

2.2.8. There may be a legacy of ground contamination in the vicinity of the Installation from any uncontrolled pollution arising from the activities associated with former industrial processes and licensed waste management facilities.

### **2.3. Pollution Prevention Measures**

2.3.1. The Installation's operational areas benefit from enclosed and segregated waste storage areas. In addition, the Installation possesses impermeable concrete surfacing creating an impervious barrier to prevent downward migration of potential contaminants. This is shown on the Site Layout Plan (drawing reference: DESC.01.01-02) contained in the Drawings provided in Appendix I.

2.3.2. In the unlikely event of loss of containment at the Installation, employees will be fully trained in the emergency spill response procedure.

2.3.3. The following control measures will be implemented:

- all waste will be stored within the designated waste storage areas;
- the site has impermeable surfacing with a sealed drainage system, this will ensure that in the event of a spillage there is no risk of emissions to land or surface waters;
- waste will be stored in secure, enclosed and segregated waste storage areas. This will further minimise the risk of odour, litter and pest infestation and will also further reduce the risk of emissions arising from a spillage / loss of containment;
- storage areas, containers and infrastructure will be inspected as part of daily inspections / housekeeping. Issues identified will be dealt with immediately and records will be logged and kept on site;
- site vehicles and equipment will be regularly maintained as per the manufacturer's recommendations; and
- emergency spill kits will be held on site to absorb any spillages of liquids and staff will be suitably trained for spill kit deployment.

### **2.4. Site Overview**

2.4.1. The EP boundary is illustrated on the Site Location Plan which may be found in Section 3 of the EP application submission.

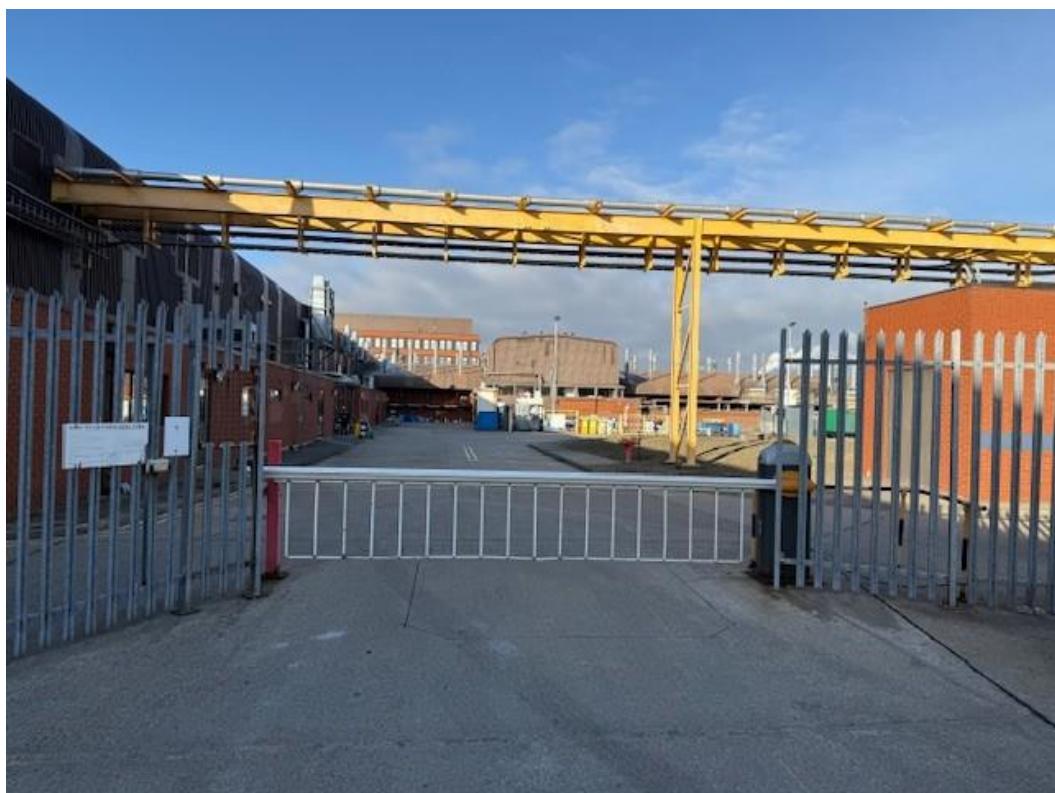

2.4.2. Figures 4 - 6 show the condition of the concrete hardstanding at the site. The concrete hardstanding is in generally good condition showing no signs of significant cracks or depressions.

2.4.3. The Site Layout Plan (drawing reference: DESC.01.01-02), which is contained as part of the Drawings provided in Appendix I of this ASGR, should be viewed in conjunction with Figures 4 – 6 as this demonstrates the proposed infrastructure arrangements and waste storage areas at the Installation.

**Figure 4: Site Entrance**

**Figure 5: Site Entrance Internal**

**Figure 6: Site Aerial View**

2.4.4. Figure 7 shows the area within the permitted area where waste storage will be located.

**Figure 7: Waste Storage Area**

### 3. IED Baseline Site Condition Report

#### 3.1. Introduction

3.1.1. This baseline risk assessment has been undertaken in accordance with the ‘European Commission (“EC”) guidance concerning baseline reports under Article 22(2) of Directive 2010/75/EU on industrial emissions’ (May 2014).

3.1.2. This section considers the contamination risk associated with hazardous substances used produced and/or released by the Installation where hazardous substances are defined as substances or mixtures defined in Article 3 of European Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on Classification, Labelling, and Packaging of substances and mixtures<sup>8</sup>.

3.1.3. The Industrial Emissions Directive (“IED”) requires an assessment to be carried out for all hazardous substances used, produced, or released within the Installation. Stages 1-3 must be completed to assess if a baseline report is required. The stages are as follows:

- Stage 1 – identify hazardous substances on site;
- Stage 2 – identify relevant hazardous substances;
- Stage 3 – assessment of site-specific pollution possibility.

#### 3.2. Stage 1 - Hazardous Substances Used, Produced and/or Released at the Installation

3.2.1. Following a review of the raw materials to be used at the Installation (see Section 5.3. of the EPTR, which may be found in Section 4 of the EP application submission), the following hazardous substances are expected to be used, produced, and/or released at the Installation:

- Ethylene glycol
- Choline chloride 75%
- Iron (II) chloride
- Iron powder
- Sodium hydroxide 30%
- Hydrochloric acid (30%)
- Sodium chlorate
- Iodine
- Hydrogen peroxide

3.2.2. All potentially polluting substances are bunded and stored on impermeable hardstanding.

<sup>8</sup> Regulation (EC) No 1272/2008 of the European Parliament and of the Council, available online at:  
<https://www.legislation.gov.uk/eur/2008/1272/article/3>

---

### 3.3. Stage 2 - Relevant Hazardous Substances

- 3.3.1. With regards to the IED, RHS can be defined as those substances or mixture defined within Article 3 of Regulation (EC) No 1272/2008, which, due to their hazardousness, persistence, mobility, biodegradability, and other characteristics, have the potential to contaminate soil or groundwater and are used, produced, and/or released by the Installation.
- 3.3.2. All RHS would be capable of contaminating soil and/or groundwater if there were no mitigation measures implemented, or if there was a contaminant pathway present as the Installation (see Table 2).

Table 2: Determination of Relevant Hazardous Substances

Substance	Hazardous Ingredients according to 1272/2008	Hazard Properties	Persistence	Physical State and Mobility	Biodegradability	RHS
Ethylene glycol	Ethylene Glycol	Harmful if swallowed May cause damage to organs through prolonged or repeated exposure	No	Liquid Colourless No odour data Miscible Stable under recommended storage conditions	Yes	Yes
Choline chloride 75%	Choline chloride 75%	May be harmful if swallowed or in contact with skin	No	Liquid Colourless Amine-like odour Miscible Adsorption to solid soil phase is expected	Yes	Yes
Iron (II) chloride	Iron (II) chloride	Harmful if swallowed Causes serious eye damage	Yes	Solid No colour data No odour data Highly mobile	No	Yes
Iron powder	Iron	Flammable solid. Self-heating; may catch fire.	No	Solid powder Light grey Odourless Insoluble No mobility data	No data	Yes
Sodium hydroxide 30%	Sodium hydroxide	May be corrosive to metals Causes severe skin burns and eye damage May cause respiratory irritation	Soluble in water, Persistence is unlikely, based on information available Bioaccumulation no data available	Liquid Colourless Odourless Water soluble Mobile in soils	No data	Yes

**Table 2: Determination of Relevant Hazardous Substances (cont.)**

Substance	Hazardous Ingredients according to 1272/2008	Hazard Properties	Persistence	Physical State and Mobility	Biodegradability	RHS
Hydrochloric acid (30%)	Hydrochloric acid (30%)	<p>May be corrosive to metals.</p> <p>Causes severe skin burns and eye damage.</p> <p>Causes serious eye damage.</p> <p>May cause respiratory irritation.</p>	No	<p>Liquid</p> <p>Light yellow</p> <p>Stinging odour</p> <p>Water soluble at 20°C</p> <p>No mobility data</p>	No data	Yes
Sodium chlorate	Sodium chlorate	<p>May cause fire or explosion; strong oxidizer</p> <p>Harmful if swallowed</p>	No	<p>Solid</p> <p>White</p> <p>Odourless</p> <p>Soluble in water</p> <p>Likely mobile</p>	No data	Yes
Iodine	Iodine	<p>Harmful if swallowed.</p> <p>Harmful if inhaled.</p> <p>Harmful in contact with skin.</p> <p>Causes skin irritation.</p> <p>Causes serious eye irritation.</p> <p>May cause respiratory irritation.</p> <p>Causes damage to organs through prolonged or repeated exposure if swallowed.</p> <p>Very toxic to aquatic life.</p>	No	<p>Solid</p> <p>Black, violet</p> <p>Pungent odour</p> <p>Slightly soluble</p>	Not applicable to inorganic substances	Yes

**Table 2: Determination of Relevant Hazardous Substances (cont.)**

Substance	Hazardous Ingredients according to 1272/2008	Hazard Properties	Persistence	Physical State and Mobility	Biodegradability	RHS
Hydrogen peroxide	Hydrogen peroxide solution	Causes serious eye damage. Harmful to aquatic life with long lasting effects.	No	Liquid Colourless No odour data No solubility data No mobility data	No data	Yes

### 3.4. Stage 3 - Assessment of the Site-Specific Pollution Possibility

3.4.1. The identified RHSs are considered in reference to the Installation to establish whether their release may provide a pollution risk, taking particular account of; the quantities of each RHS, how and where they are stored, transported and used.

3.4.2. Their release may represent a singular emission or an accumulation of multiple emissions.

3.4.3. Emissions may occur under the following circumstances:

- planned emissions,
- accidents and/or incidents, and
- routine operations.

3.4.4. The planned point source emissions at the Installation to air are aldehydes, Volatile Organic Compounds (“VOCs”) and acids through emission points A1 and A2. Planned point source emissions to water are through a connection to foul sewer. See section 6 of DESC.01.01/EPTR for further information.

3.4.5. As there are no planned emissions to land, surface water or groundwater, these would be limited to accidents or incidents.

3.4.6. Table 3 discusses the delivery and storage arrangements for each RHS.

**Table 3: Relevant Hazardous Substances – Delivery and Storage Arrangements**

RHS	Maximum Stored On-Site	Delivery Vehicle	Use
Ethylene glycol	10 tonnes	Flat bed closed truck	DES make up
Choline chloride 75%	10 tonnes	Flat bed closed truck	DES make up
Iron (II) chloride	5 tonnes	Flat bed closed truck	DES make up
Iron powder	100 litres	Flat bed closed truck	Cementation step
Sodium hydroxide 30%	1 tonne	Flat bed closed truck	Precipitation step
Hydrochloric acid (30%)	5 tonnes	Flat bed closed truck	DES 1/2 regeneration
Sodium chlorate	5 tonnes	Flat bed closed truck	DES 1 regeneration
Iodine	1 tonne	Flat bed closed truck	DES 2 make up
Hydrogen peroxide	1 tonne	Flat bed closed truck	DES 2 regeneration

3.4.7. Table 4 discusses the overall pollution risk when considering the on-site pollution prevention measures.

**Table 4: Relevant Hazardous Substances Pollution Risk**

Relevant RHS	Receptors	Pathway	Pollution Prevention and Risk Mitigation	Circumstances under which emissions may occur	Probability of Exposure	Overall Risk
Ethylene glycol	Ground, soil and surface waters	Overland flow/via drainage network	The storage tanks and/or containers will be either double walled and internally bunded or located within a sealed bund with a capacity of 110% of the total storage volume.	Delivery to Site	Low with appropriate control measures in place	Not Significant
Choline chloride 75%			Deliveries will be supervised by suitably trained personnel in areas isolated from the drainage network. In addition, the drainage network for the Installation will benefit from a penstock valve to aid isolation to minimise any control any pollution leaving the site.	Transfer from delivery vehicle to storage area		
Iron (II) chloride						
Sodium hydroxide 30%						
Hydrochloric acid (30%)			All employees will be suitably trained in the Site spill response procedure and spill kits will be strategically located throughout the Site.			
Sodium chlorate						
Iodine						
Hydrogen peroxide			Routine inspection and maintenance of site surfacing and bund integrity will be undertaken in line with the Installation's Environmental Management System ("EMS") to observe any spillages and ensure any remedial action required can be undertaken immediately.			
Iron powder	Ground, soil and surface waters	Overland flow/via drainage network	Appropriate handling and storage.	Delivery to Site Transfer from delivery vehicle to storage area	Very low with appropriate control measures in place and due to the very small quantities used and kept on-site at any given time	Not Significant

---

### 3.5. Requirement for Intrusive Site Investigation

- 3.5.1. Following completion of Stages 1-3 of the baseline assessment, it has been determined that the RHSs which will be used, stored and produced throughout operations at the Installation do not pose an overall significant risk.
- 3.5.2. The extent and condition of the site infrastructure, the enclosed equipment and bunded storage tanks, the arrangement of the drainage network and the use of appropriate control measures will prevent any contamination from occurring as a result of the proposed activities.
- 3.5.3. Taking both the history of the Installation's land and the recorded pollution incidents in the vicinity of the Installation into consideration, the potential for on-site pollution to have occurred is considered to be low. It is assumed a condition will be contained in the environmental permit requiring 5 and 10 year groundwater and soil monitoring to be carried out, which will help establish the baseline conditions.

## 4. PERMITTED ACTIVITIES

### 4.1. Permitted Activities

4.1.1. The Installation comprises an area within The Wilton Centre industrial area. DEScycle are developing a novel recycling process that uses a deep eutectic solvent ("DES") to extract base and precious metals from electronic waste. This involves extracting metals from the waste, re-covering the metals and finally recycling the solvent.

4.1.2. The activities undertaken at the Installation will comprise two listed activities and a bespoke waste operation that fall under Schedule 1 and Schedule 9 of the Environmental Permitting (England and Wales) Regulations 2016 as amended ("EP Regulations") respectively.

4.1.3. The activities proposed are detailed in Table 5.

**Table 5: Permitted Activities**

Activity Reference	Activity	Description of Activities	Limits of Activities
AR1	<b>Schedule 1</b> Section 2.2 Part A(1)(a)	Producing non-ferrous metals from secondary raw materials by chemical activities	From receipt of raw materials and shredded WEEE waste to the storage and despatch of product
AR2	Section 4.2 Part A(1)(a) (v)	Producing inorganic chemicals such metal oxides	From receipt of raw materials and shredded WEEE waste to the storage and despatch of product
AR3	<b>Schedule 9</b> Bespoke Waste Operation	<p><b>R4:</b> Recycling/reclamation of metals and metal compounds.</p> <p><b>R5:</b> Recycling/reclamation of other inorganic materials</p> <p><b>R13:</b> Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced</p>	<p>Shredding of WEEE waste (printed circuit boards)</p> <p>The maximum quantity of waste to be treated at the site shall not exceed 75 tonnes of non-hazardous waste or 10 tonnes of hazardous waste.</p> <p>No waste shall be stored on site for longer than 6 months.</p>

4.1.4. The total quantity of waste accepted at the Installation will be up to 21,000 tonnes per annum. This is estimated to comprise 18,625 tonnes of non-hazardous waste and 2,475 tonnes of hazardous waste. However, in reality it will be significantly less.

---

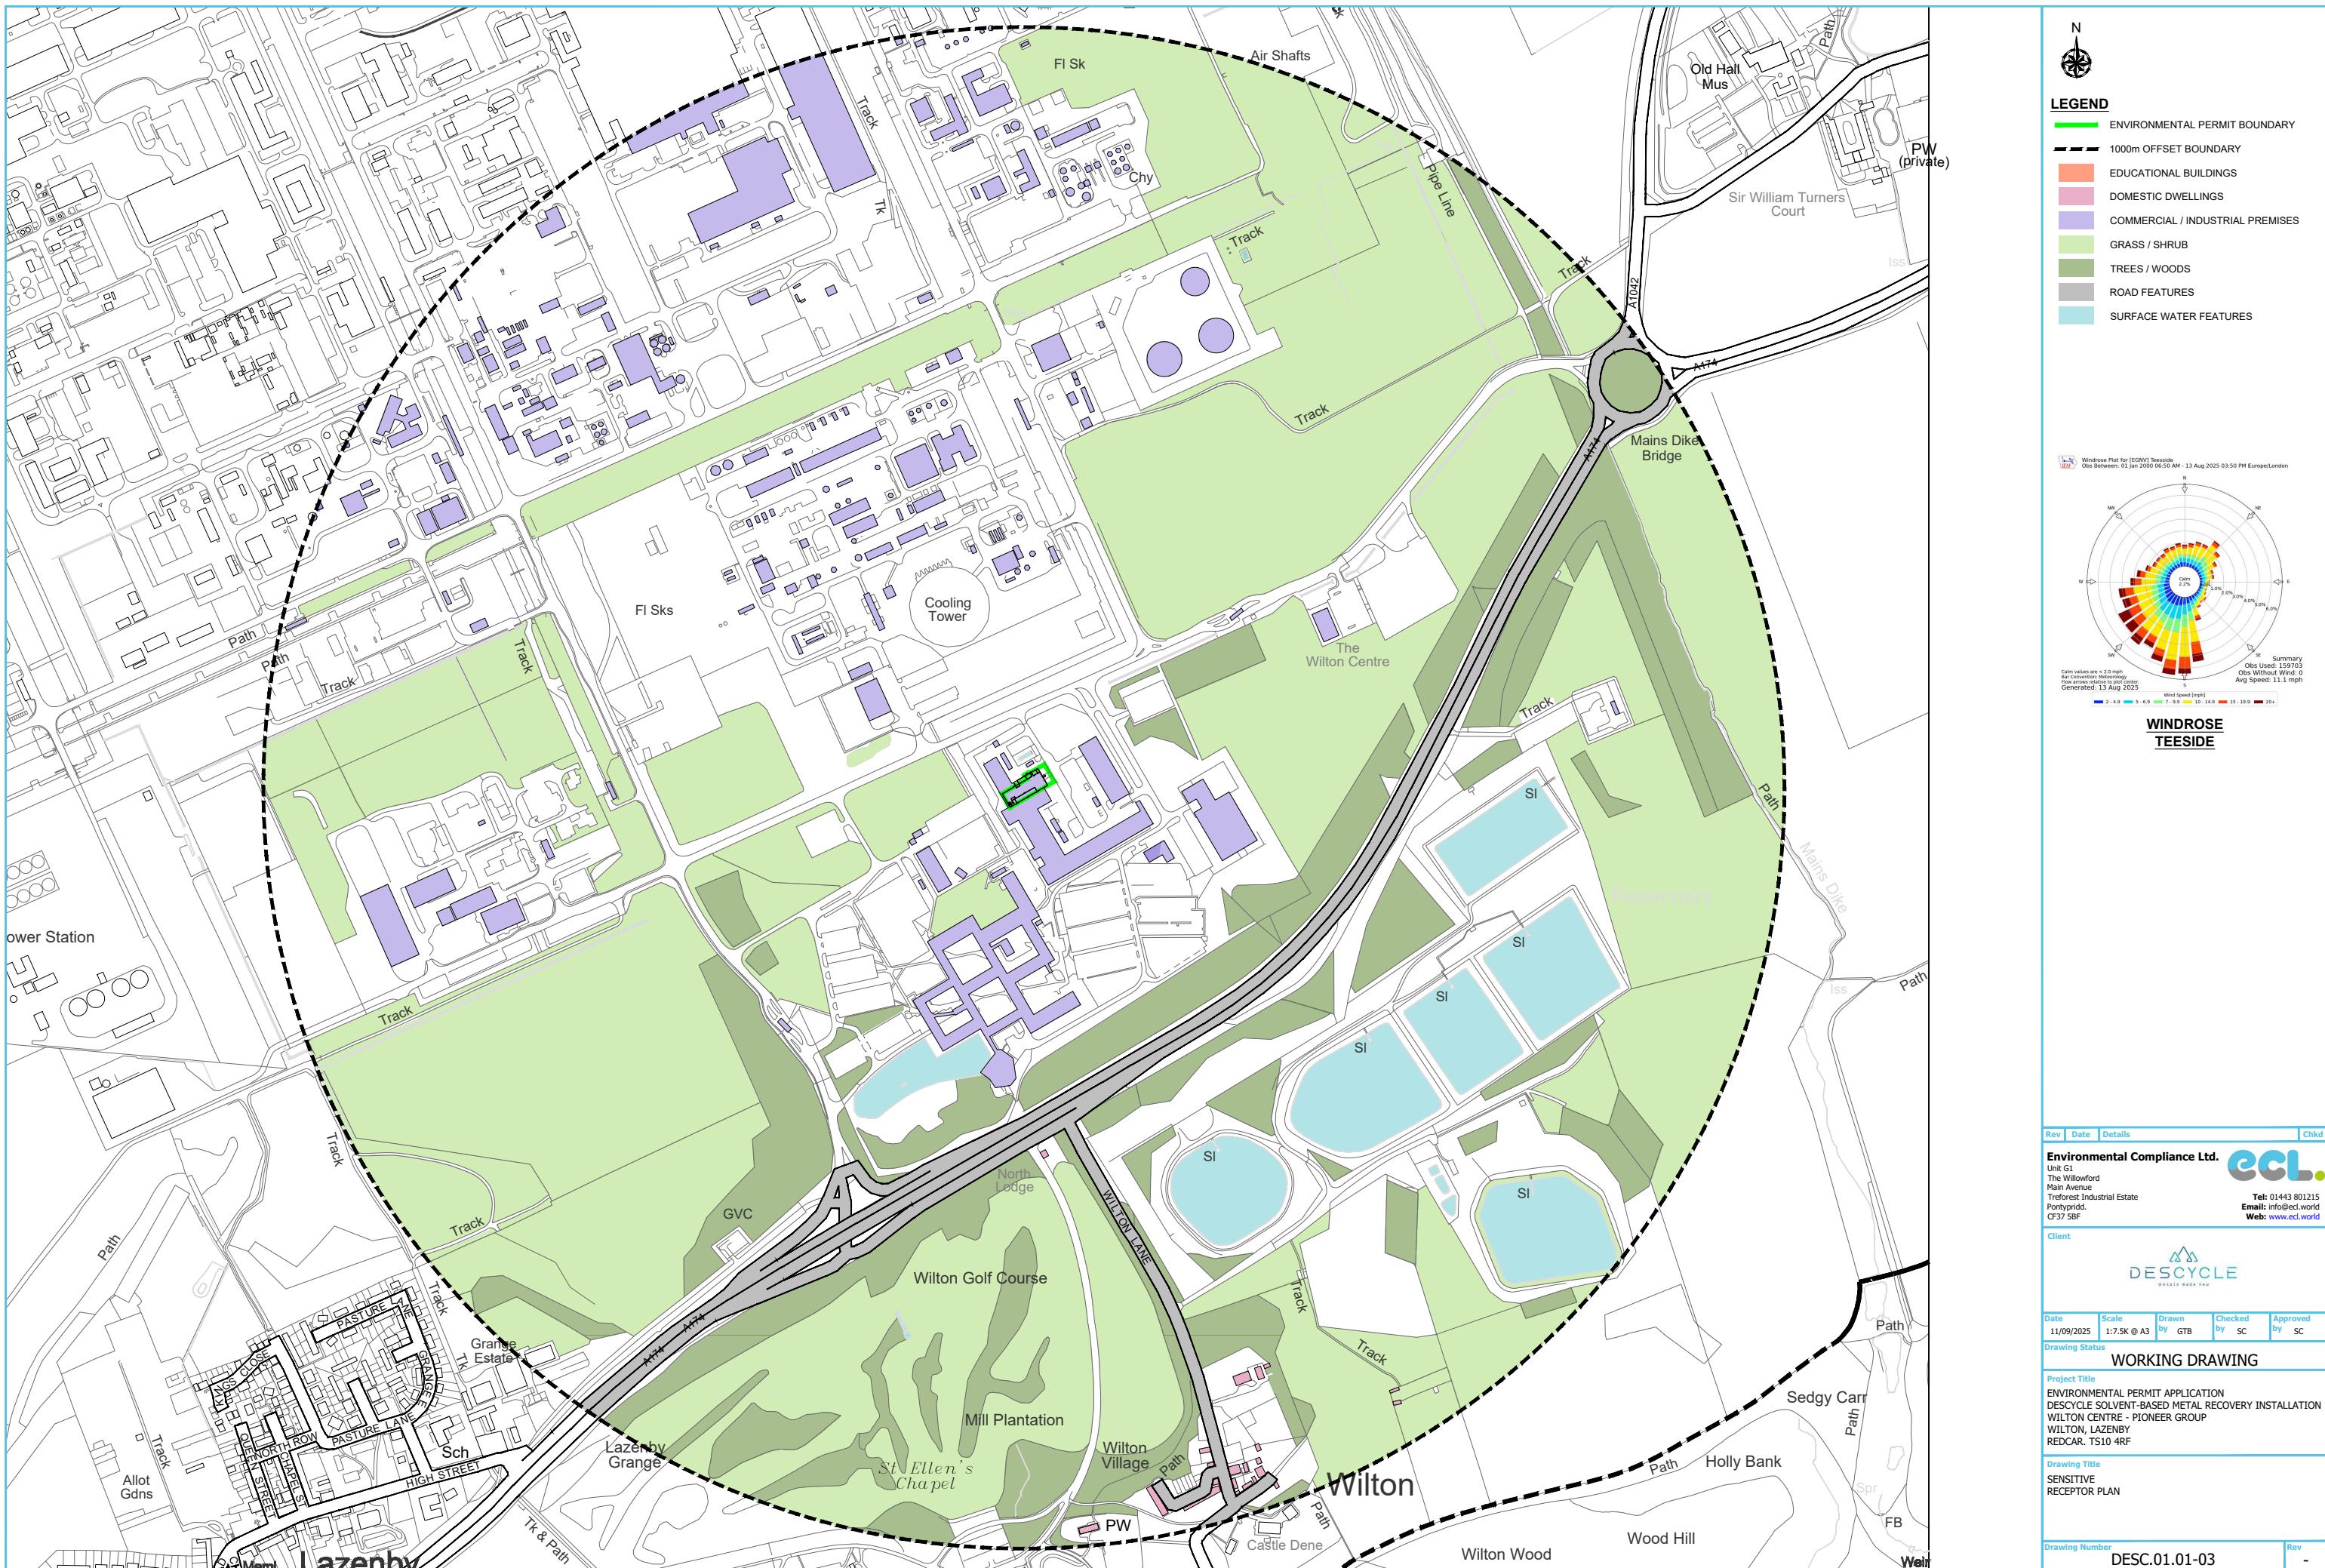

- 4.1.5. A Site Layout Plan (drawing reference: DESC.01.01-02) has been produced illustrating the proposed activity layout and is contained within the Drawings provided in Appendix I of this ASCR.
- 4.1.6. An Environmental Risk Assessment (“ERA”) (DESC.01.01/ERA) has been prepared for this Environmental Permit application submission. Additionally, a Site Management Plan is part of the Environmental Management System (“EMS”) and will provide details on the total inventory of potentially polluting substances to be held at the Installation.

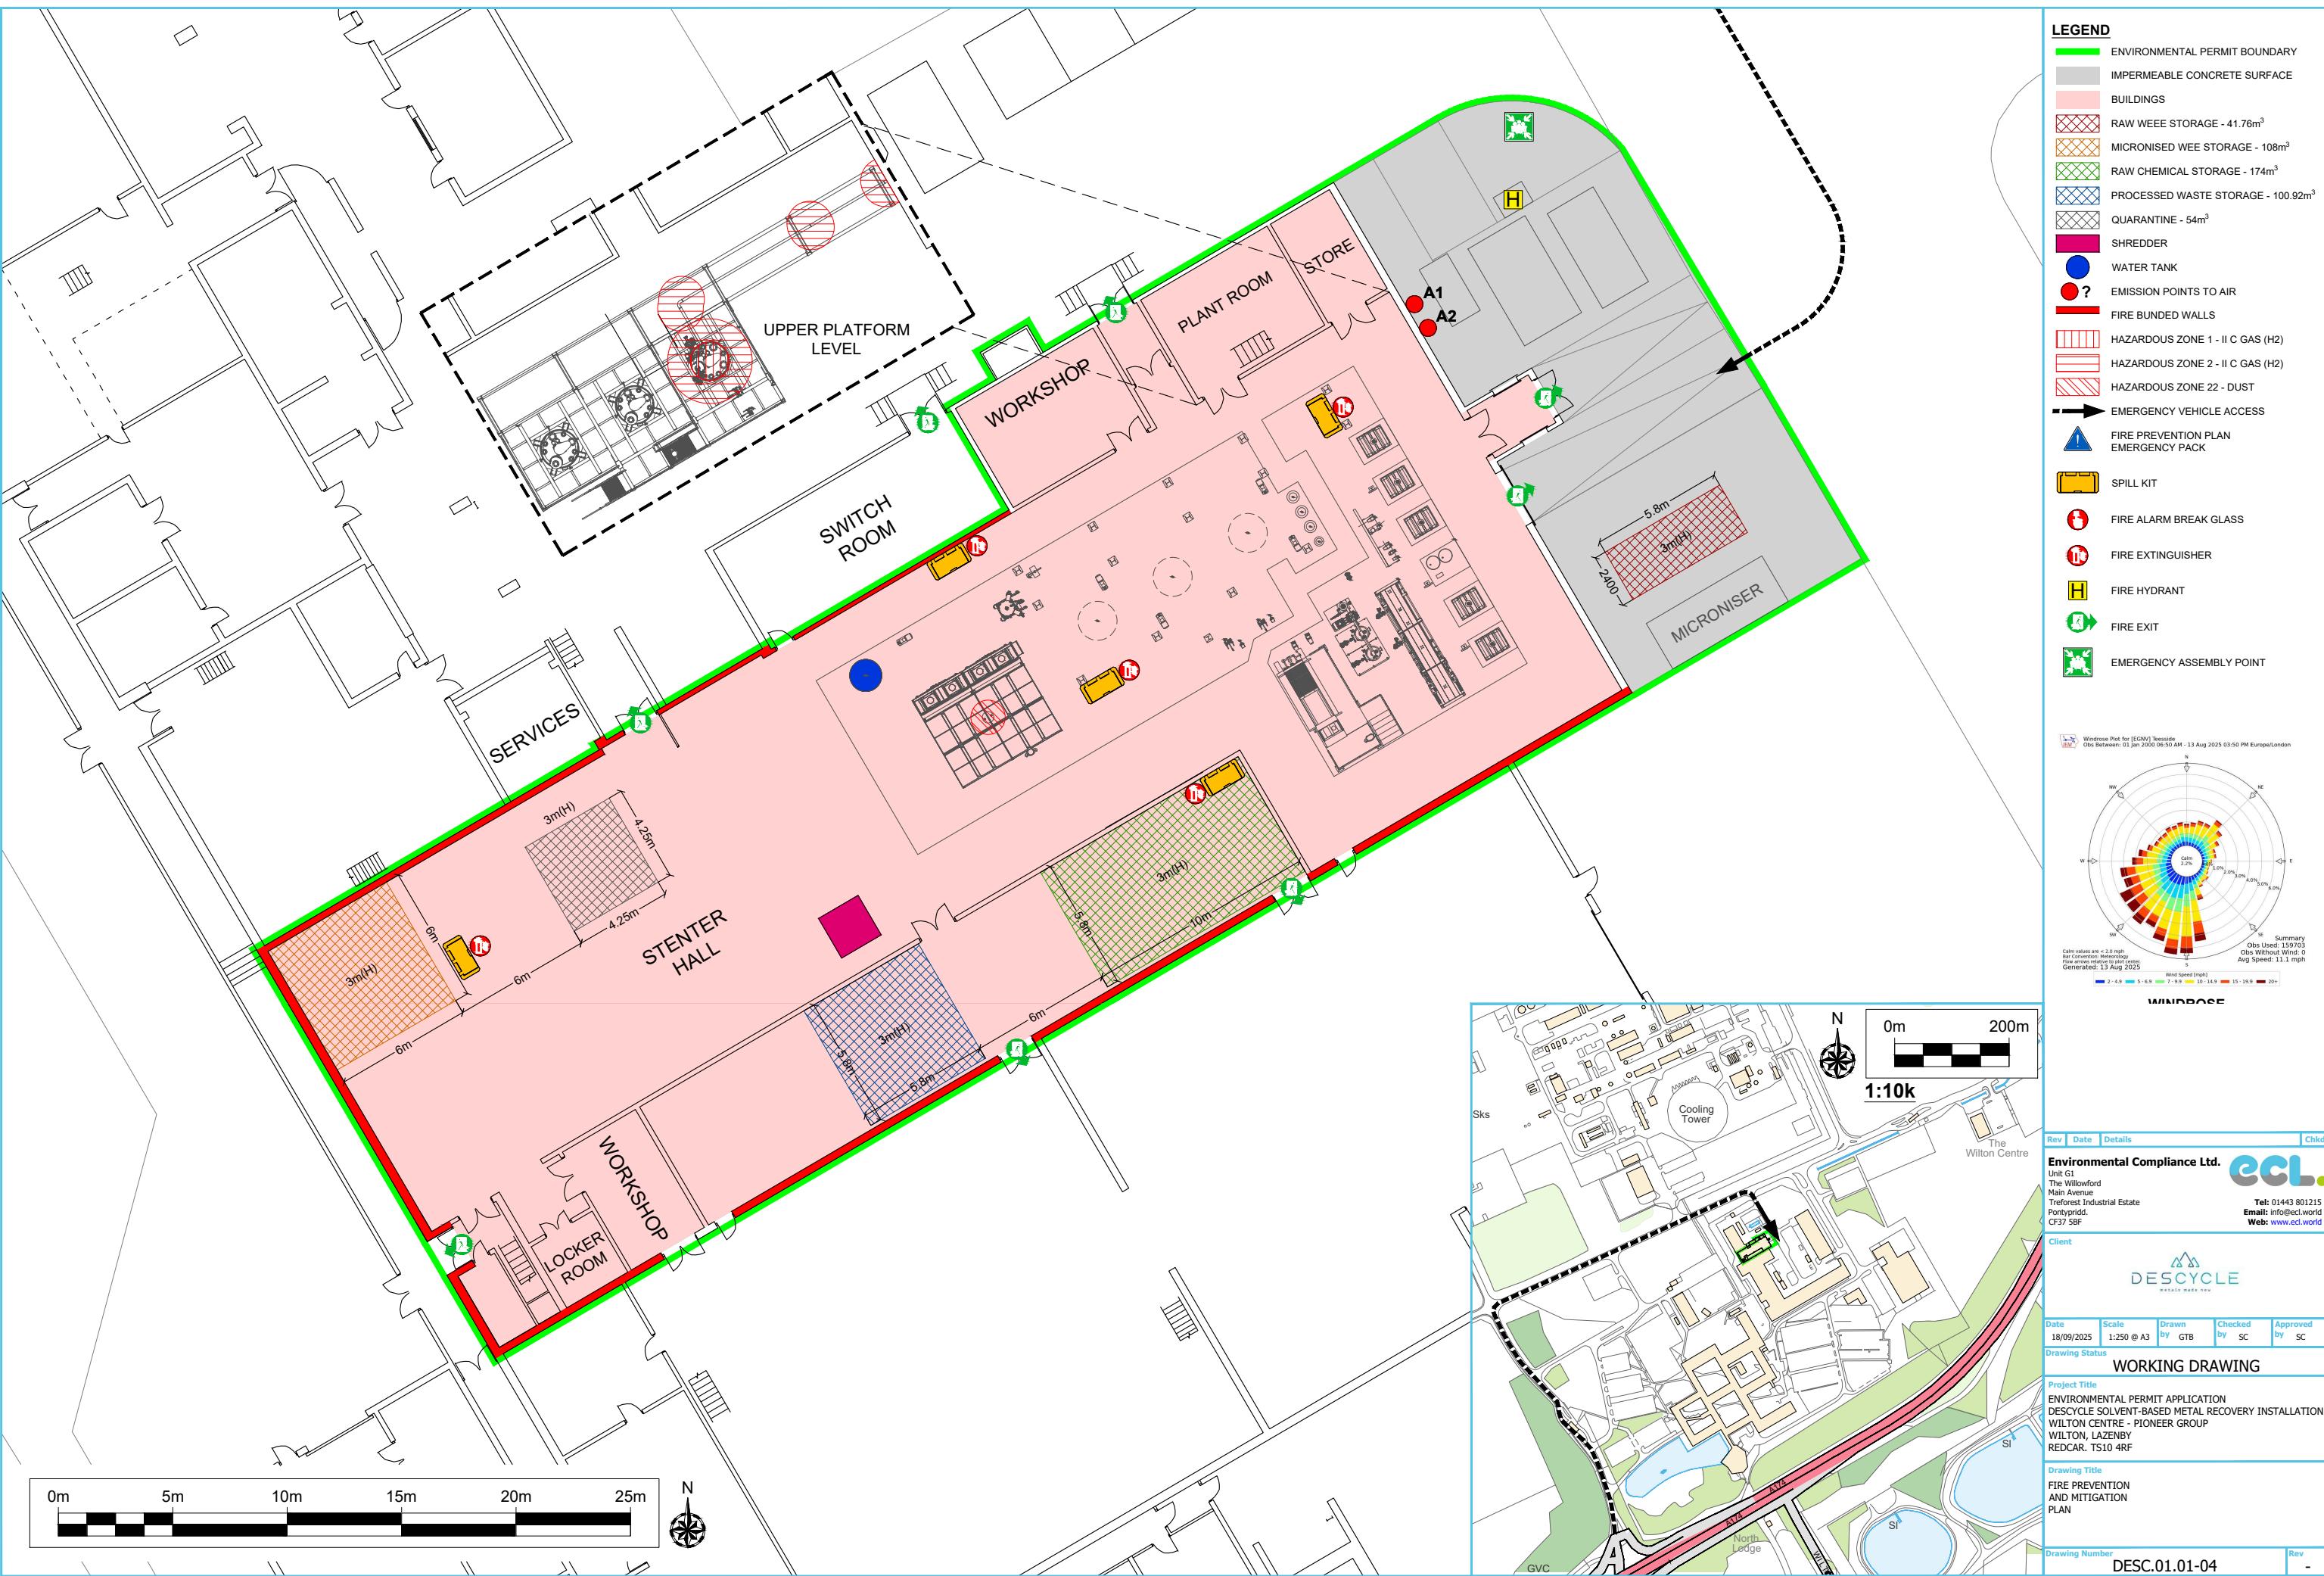

---

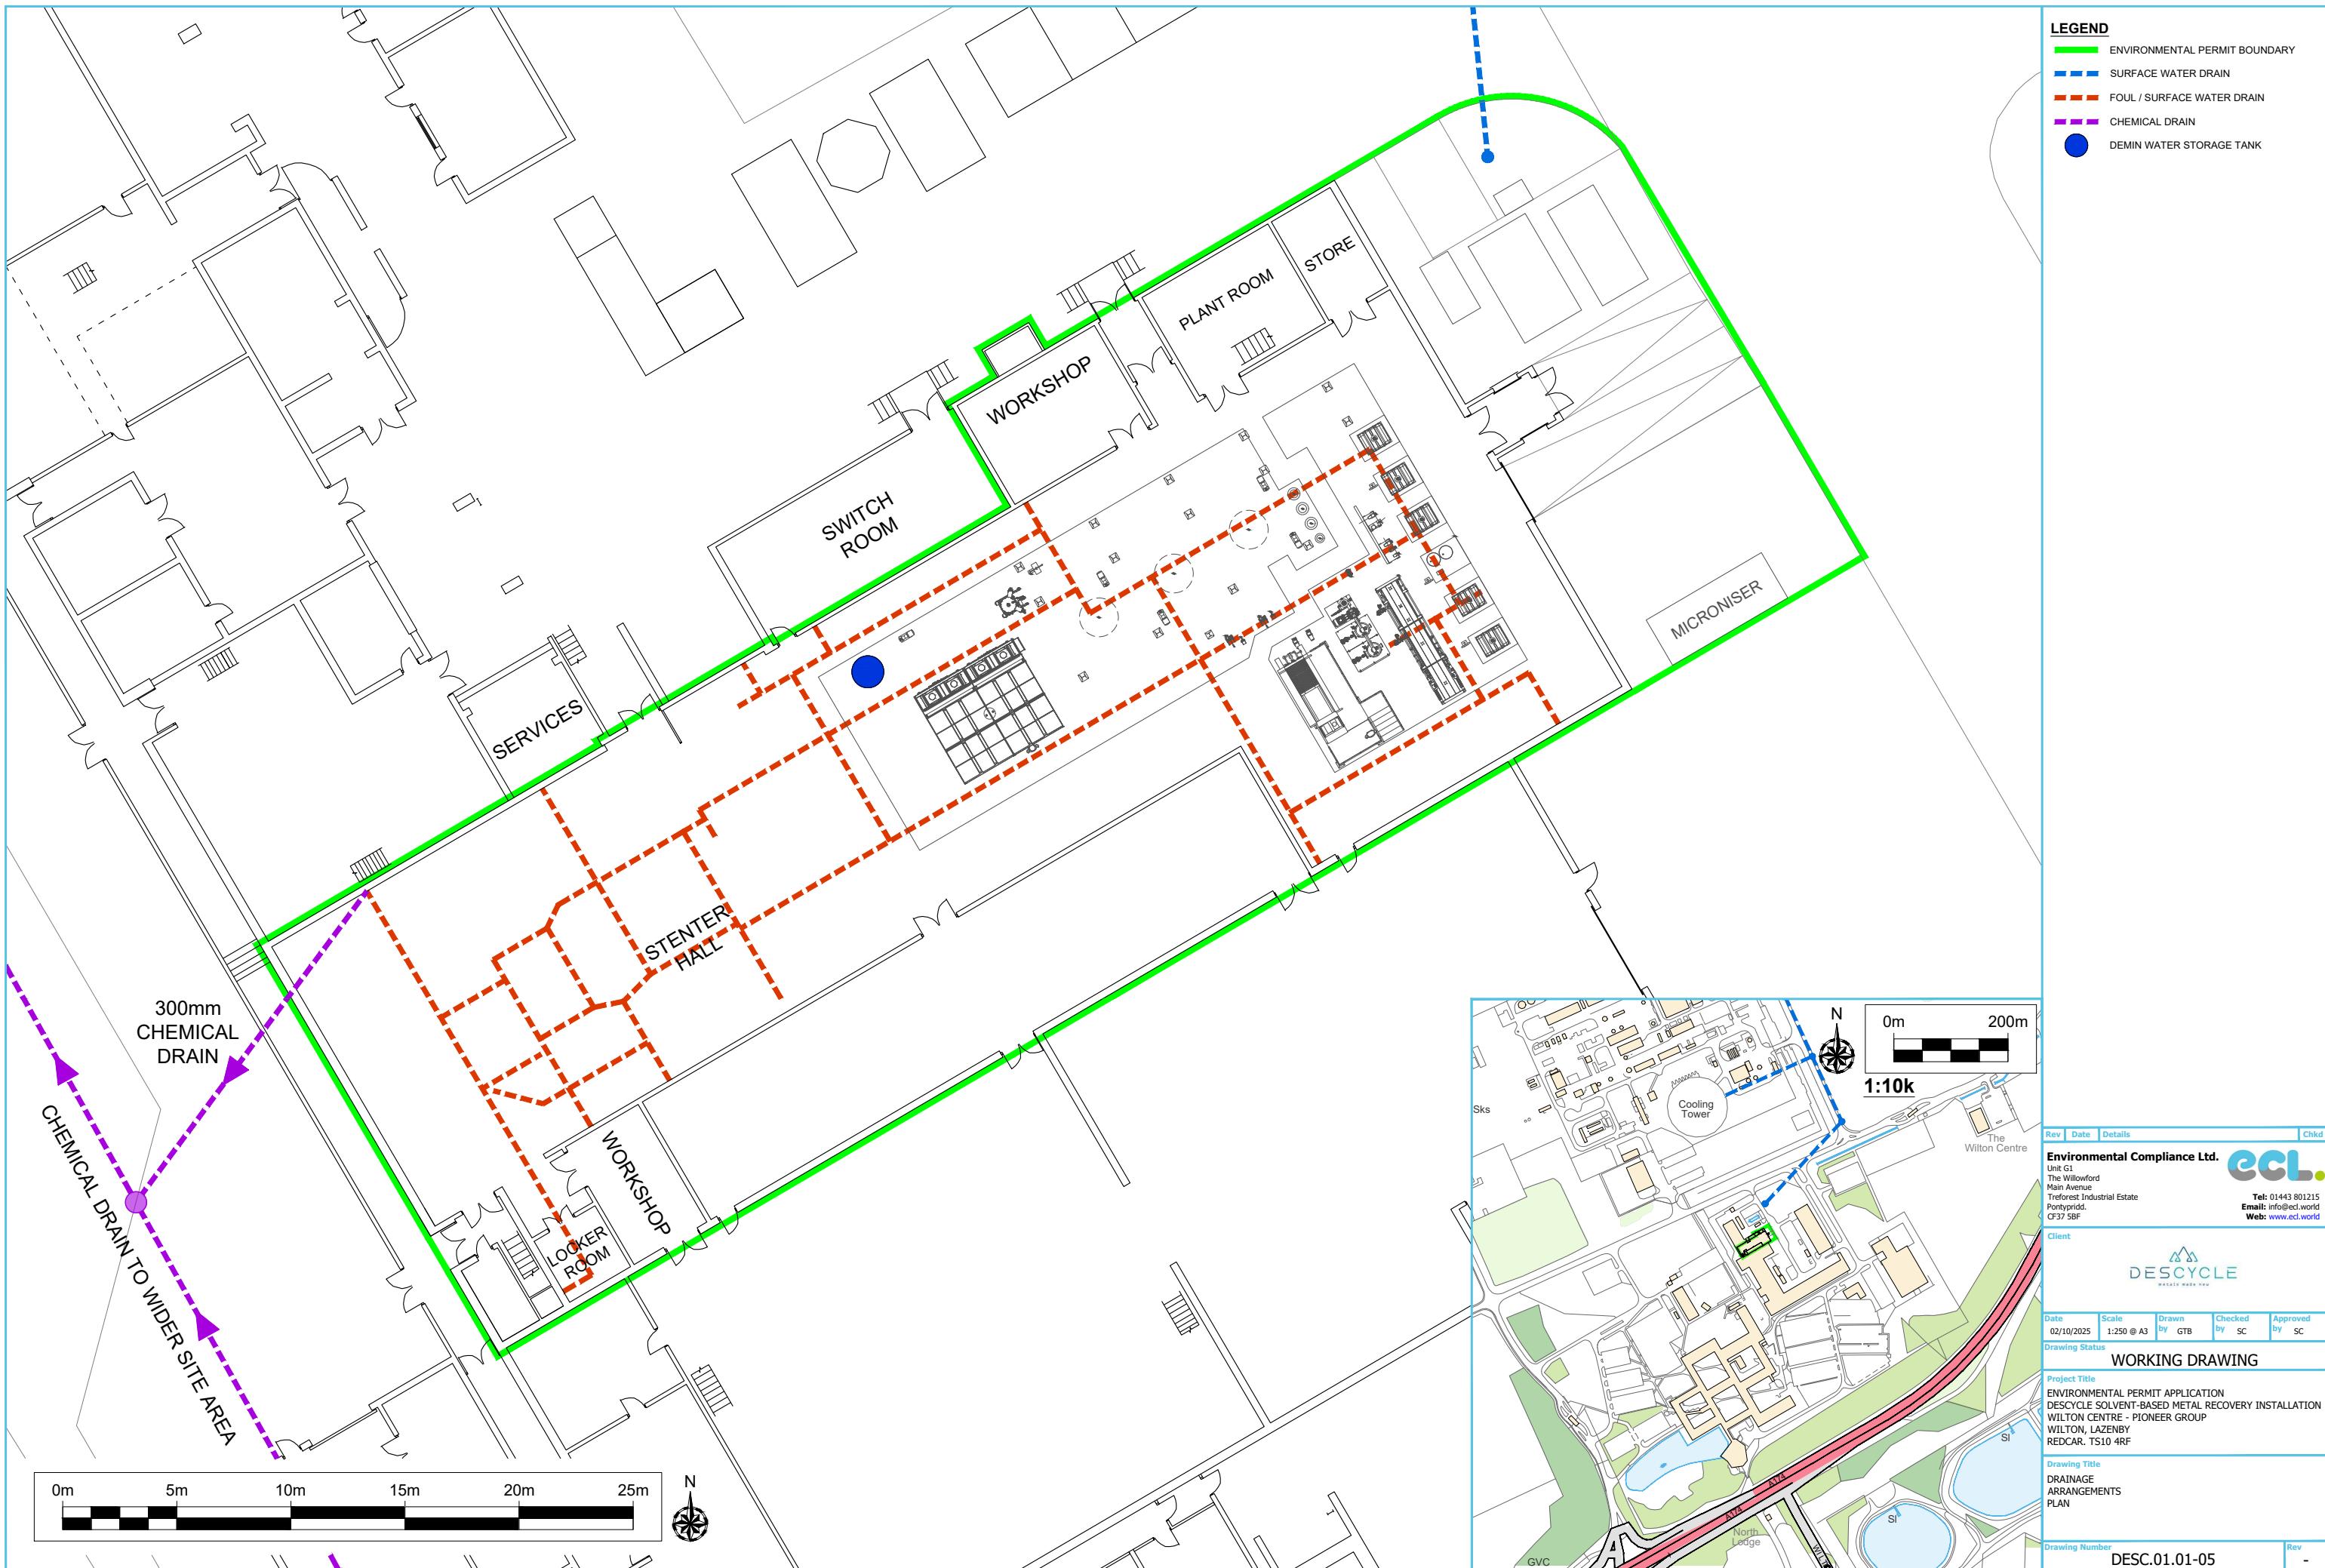

## APPENDIX I DRAWINGS

---

## APPENDIX II ENVIROCHECK REPORT

## Envirocheck® Report: Datasheet

### Order Details:

**Order Number:**  
382094886\_1\_1

**Customer Reference:**  
DESC.01.01

**National Grid Reference:**  
458220, 520720

**Slice:**  
A

**Site Area (Ha):**  
0.17

**Search Buffer (m):**  
1000

### Site Details:

DEScycle, TDA,  
Wilton Centre - Pioneer Group,  
Lazenby  
REDCAR  
TS10 4RF

### Client Details:

Mr S Burley  
Environmental Compliance Ltd  
Unit G1  
Main Avenue  
Trefforest Industrial Estate  
Pontypridd  
CF37 5YL

### Prepared For:

DesCycle  
Wilton Centre - Pioneer Group  
Wilton  
Lazenby  
Redcar  
TS10 4RF

### Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

### Copyright Notice

© Landmark Information Group Limited 2025. The Copyright on the information and data and its format as contained in this Envirocheck® Report ("Report") is the property of Landmark Information Group Limited ("Landmark") and several other Data Providers, including (but not limited to) Ordnance Survey, British Geological Survey, the Environment Agency/Natural Resources Wales and Natural England, and must not be reproduced in whole or in part by photocopying or any other method. The Report is supplied under Landmark's Terms and Conditions accepted by the Customer. A copy of Landmark's Terms and Conditions can be found with the Index Map for this report. Additional copies of the Report may be obtained from Landmark, subject to Landmark's charges in force from time to time. The Copyright, design rights and any other intellectual rights shall remain the exclusive property of Landmark and/or other Data providers, whose Copyright material has been included in this Report. © Environment Agency & United Kingdom Research and Innovation 2025. © Natural Resources Wales & United Kingdom Research and Innovation 2025.

### Natural England Copyright Notice

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

### Scottish Natural Heritage Copyright

Contains SNH information licensed under the Open Government Licence v3.0.

### Ove Arup Copyright Notice

The Mining Instability data was obtained on licence from Ove Arup & Partners Limited (for further information, contact mining.review@arup.com). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The supplied Mining Instability data is derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

### Stantec Copyright Notice

The cavity data presented has been extracted from the PBA (now Stantec UK Ltd) enhanced version of the original DEFRA national cavity databases. Stantec UK Ltd retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by Stantec UK Ltd. In no event shall Stantec UK Ltd or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

### Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England. The probability result is only valid for properties above ground. All basement and cellar areas are considered to be at additional risk from high radon levels. If an underground room such as a cellar or basement makes up part of the living or working accommodation, the property should be tested regardless of Radon Affected Area status.

### Natural Resources Wales Copyright Notice

Contains Natural Resources Wales information © Natural Resources Wales and Database Right. All rights Reserved. Contains Ordnance Survey Data. Ordnance Survey Licence number 100019741. Crown Copyright and Database Right. Contains Natural Resources Wales information © Natural Resources Wales and Database Right. All rights Reserved. Some features of this information are based on digital spatial data licensed from the Centre for Ecology & Hydrology © NERC (CEH), Defra, Met Office and DARD Rivers Agency © Crown copyright. © Cranfield University. © James Hutton Institute. Contains OS data © Crown copyright and database right 2025. Land & Property Services © Crown copyright and database right.

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
<b>Agency &amp; Hydrological</b>					
BGS Groundwater Flooding Susceptibility	pg 1	Yes	Yes	Yes	n/a
Contaminated Land Register Entries and Notices					
Discharge Consents	pg 1				2
Prosecutions					
Enforcement and Prohibition Notices	pg 2			3	
Integrated Pollution Controls	pg 2		22	26	10
Integrated Pollution Prevention And Control	pg 11		1	9	4
Local Authority Integrated Pollution Prevention And Control					
Local Authority Pollution Prevention and Controls	pg 14		1		
Local Authority Pollution Prevention and Control Enforcements					
Nearest Surface Water Feature	pg 14		Yes		
Pollution Incidents to Controlled Waters					
Historical Prosecutions					
Registered Radioactive Substances	pg 14		1	9	13
Substantiated Pollution Incident Register	pg 18			1	1
Water Abstractions	pg 18				(*3)
Water Industry Act Referrals					
Groundwater Vulnerability Map	pg 19	Yes	n/a	n/a	n/a
Groundwater Vulnerability - Soluble Rock Risk			n/a	n/a	n/a
Groundwater Vulnerability - Local Information			n/a	n/a	n/a
Bedrock Aquifer Designations	pg 19	Yes	n/a	n/a	n/a
Superficial Aquifer Designations	pg 19	Yes	n/a	n/a	n/a
Source Protection Zones					
Extreme Flooding from Rivers or Sea without Defences				n/a	n/a
Flooding from Rivers or Sea without Defences				n/a	n/a
Areas Benefiting from Flood Defences				n/a	n/a
Flood Water Storage Areas				n/a	n/a
Flood Defences				n/a	n/a
OS Water Network Lines	pg 19		1	5	38
Water Framework Directive - Catchment	pg 24	Yes			
Water Framework Directive - Groundwater	pg 24	Yes			
Water Framework Directive - Surface Waters					

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
<b>Waste</b>					
BGS Recorded Landfill Sites					
Historical Landfill Sites					
Integrated Pollution Control Registered Waste Sites					
Licensed Waste Management Facilities (Landfill Boundaries)	pg 25			1	1
Licensed Waste Management Facilities (Locations)	pg 25		1		
Local Authority Landfill Coverage	pg 25	1	n/a	n/a	n/a
Local Authority Recorded Landfill Sites					
Potentially Infilled Land (Non-Water)					
Potentially Infilled Land (Water)	pg 25		5	4	10
Registered Landfill Sites	pg 26				1
Registered Waste Transfer Sites					
Registered Waste Treatment or Disposal Sites					
<b>Hazardous Substances</b>					
Control of Major Accident Hazards Sites (COMAH)	pg 27			6	7
Explosive Sites					
Notification of Installations Handling Hazardous Substances (NIHHS)	pg 28			2	
Planning Hazardous Substance Consents	pg 28		5	36	3
Planning Hazardous Substance Enforcements					

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
<b>Geological</b>					
BGS 1:625,000 Solid Geology	pg 36	Yes	n/a	n/a	n/a
BGS Estimated Soil Chemistry	pg 36	Yes		Yes	
BGS Recorded Mineral Sites					
BGS Urban Soil Chemistry					
BGS Urban Soil Chemistry Averages					
CBSCB Compensation District			n/a	n/a	n/a
Coal Mining Affected Areas			n/a	n/a	n/a
Mining Instability	pg 36	Yes	n/a	n/a	n/a
Man-Made Mining Cavities					
Natural Cavities					
Non Coal Mining Areas of Great Britain				n/a	n/a
Potential for Collapsible Ground Stability Hazards	pg 36	Yes		n/a	n/a
Potential for Compressible Ground Stability Hazards				n/a	n/a
Potential for Ground Dissolution Stability Hazards				n/a	n/a
Potential for Landslide Ground Stability Hazards	pg 36	Yes		n/a	n/a
Potential for Running Sand Ground Stability Hazards	pg 36	Yes		n/a	n/a
Potential for Shrinking or Swelling Clay Ground Stability Hazards	pg 36	Yes		n/a	n/a
Radon Potential - Radon Affected Areas			n/a	n/a	n/a
Radon Potential - Radon Protection Measures			n/a	n/a	n/a
<b>Industrial Land Use</b>					
Contemporary Trade Directory Entries	pg 37		11	11	6
Fuel Station Entries					
Points of Interest - Commercial Services	pg 39			1	1
Points of Interest - Education and Health					
Points of Interest - Manufacturing and Production	pg 39		3	76	125
Points of Interest - Public Infrastructure	pg 56				14
Points of Interest - Recreational and Environmental					
Underground Electrical Cables					

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m (*up to 2000m)
<b>Sensitive Land Use</b>					
Ancient Woodland					
Areas of Adopted Green Belt					
Areas of Unadopted Green Belt					
Areas of Outstanding Natural Beauty					
Environmentally Sensitive Areas					
Forest Parks					
Local Nature Reserves					
Marine Nature Reserves					
National Nature Reserves					
National Parks					
Nitrate Sensitive Areas					
Nitrate Vulnerable Zones					
Ramsar Sites					
Sites of Special Scientific Interest					
Special Areas of Conservation					
Special Protection Areas					
World Heritage Sites

## Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

### Slice

Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline), that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

### Segment

A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

### Quadrant

A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

## Yorkshire

Published 1857

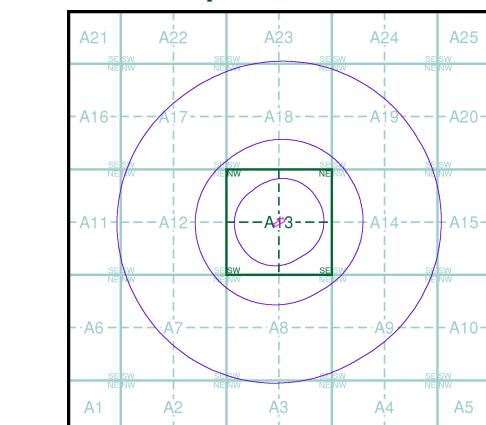

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Middlesbrough

Published 1975

Source map scale - 1:10,000

These maps were produced by the Russian military during the Cold War between 1950 and 1997, and cover 103 towns and cities throughout the U.K. The maps are produced at 1:25,000, 1:10,000 and 1:5,000 scale, and show detailed land use, with colour-coded areas for development, green areas, and non-developed areas. Buildings are coloured black and important building uses (such as hospitals, post offices, factories etc.) are numbered, with a numbered key describing their use.

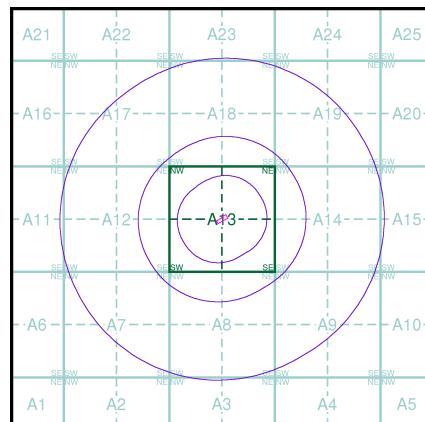

They were produced by the Russians for the benefit of navigation, as well as strategic military sites and transport hubs, for use if they were to have invaded the U.K. The detailed information provided indicates that the areas were surveyed using land-based personnel, on the ground, in the cities that are mapped.

Published 1976

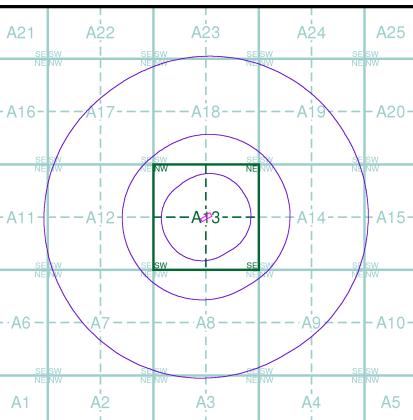

## Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Middlesbrough

Published 1991

Source map scale - 1:25,000

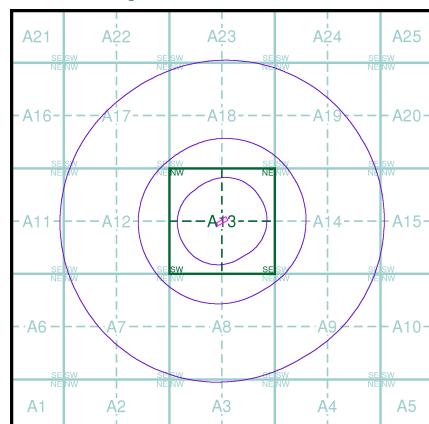

These maps were produced by the Russian military during the Cold War between 1950 and 1997, and cover 103 towns and cities throughout the U.K. The maps are produced at 1:25,000, 1:10,000 and 1:5,000 scale, and show detailed land use, with colour-coded areas for development, green areas, and non-developed areas. Buildings are coloured black and important building uses (such as hospitals, post offices, factories etc.) are numbered, with a numbered key describing their use.

They were produced by the Russians for the benefit of navigation, as well as strategic military sites and transport hubs, for use if they were to have invaded the U.K. The detailed information provided indicates that the areas were surveyed using land-based personnel, on the ground, in the cities that are mapped.

## 10k Raster Mapping

Published 2000

Source map scale - 1:10,000

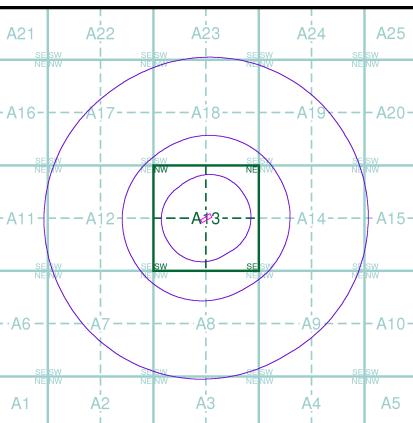

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

## VectorMap Local

Published 2025

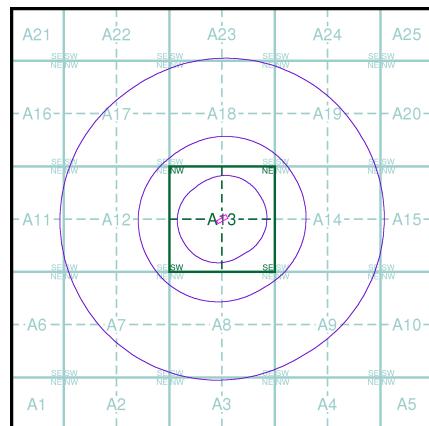

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a simple vector dataset at a nominal scale of 1:10,000, covering the whole of Great Britain, that has been designed for creating graphical mapping. OS VectorMap Local is derived from large-scale information surveyed at 1:1250 scale (covering major towns and cities), 1:2500 scale (smaller towns, villages and developed rural areas), and 1:10 000 scale (mountain, moorland and river estuary areas).

**Additional SIMs**

**Published 1982 - 1988**

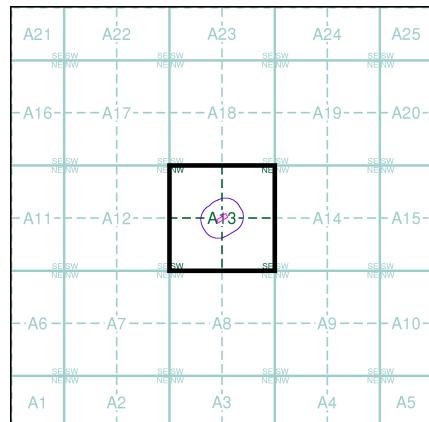

**Source map scale - 1:2,500**

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are further, minor editions of mapping which were produced and published in between the main editions as an area was updated. They date from 1947 to 1994, and contain detailed information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Large-Scale National Grid Data

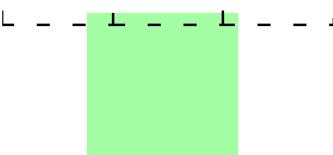

Published 1993

Source map scale - 1:1,250

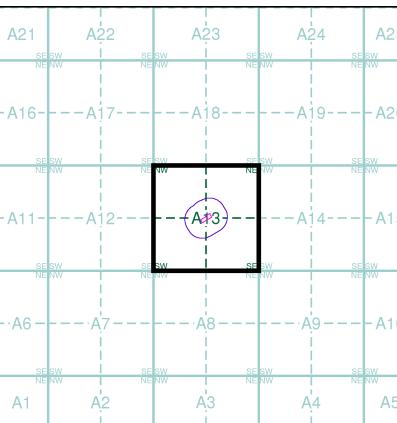

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

### Map Name(s) and Date(s)
