Dear Francesco,

Thank you for your letter dated 07/08/2024.

Missing information- bp request for extension

We are in the process of preparing additional information for our application for an Environmental Permit. We acknowledge that extra information is needed to provide clarity on our activities to enable you to perform a thorough assessment.

We request an extension to enable us to prepare this information to a satisfactory quality level and submit a robust application that meets the requirements of your letter.

We are confident that we will be able to provide the right level of detail to enable you to duly make the application by 11 October 2024. This is the shortest possible time frame needed to provide all the information requested in this letter, amend the relevant application documents and pay the correct application payment.

We request that you do not return our application and await our application which will provide missing information and close any optionality that was included in the application documents.

The application for Development Consent is now in the Examination Phase as of 28 August 2024. For the reasons stated in the Prioritisation Letter dated 5 June 2024 we request an extension to 11 October.

Missing application payment

Before our application is resubmitted, we will engage with you to ensure that we send the correct fee with the application.

Outstanding pre-application balance to be paid

We request that the invoice is resent to bp so that the outstanding balance can be paid immediately.

We appreciate that this is an exceptional case and look forward to hearing from you shortly.

Sincerely,

Rebecca Shadlock
Senior Environmental and Social Advisor
