Customer Testimonial:

"Liebherr Great-Britain and Liebherr-Rental Ltd have been purchasing products from Fireward for a number of years. Their service and products have evolved over the years giving Liebherr the fire suppression partner we need. We have full confidence if an issue may arise, Fireward will respond promptly".

Lee Palmer, Managing Director | Liebherr-Great Britain Ltd

AS CHOSEN BY:

Customer Address		Installation Address	
Greenology 51 Sotherby Road, Middlesbrough TS3 8BS		Greenology 51 Sotherby Road, Middlesbrough TS3 8BS	
Quotation No: FWQ005-182		Subject:	Tana Shark 440 18KG Dry Chemical Automatic Fire Suppression System With 2 X Manual Actuator

Qty	Description	Selling price
1	Tana Shark 440 18KG Dry Chemical Automatic Fire Suppression System With 2 X Manual Actuator	██████████
1	Installation of a battery isolator to cut off machines electrical supply.	██████████
1	Installation of separate equipment shutdown circuit which shuts the piece of equipment down after detection of a fire.	██████████

Please note: The weights quoted above are actual weights and not tank weights.

Battery Isolation ensures that when an electrical fire starts, the electrical source is isolated. Cutting the power minimises the damage and prevents arcing. Fireward recommends all installations are fitted with Battery Isolation.

All quotations are valid for 30 days from the date of quotation.

TOTAL AMOUNT
Excluding VAT:

██████████

Optional Equipment (please read)

Fireward offers a number of optional extras, including Battery Isolation, Machine / Engine Shutdown, Manual Actuator, In-Cab Monitor. These features have been added to the quote and are designed to work in conjunction with the system to help minimise damage. These features can be removed. By signing this quotation you understand that not specifying this equipment may reduce or limit the ability for the system to successfully suppress a fire. For more information, please email us at sales@fireward.co.uk.

Safety Critical Inspection Information & Costs

Your Fireward system must be inspected every 6 or 12 months depending on application. Failure to have this safety critical inspection completed will void any warranty and may put the operator and machine at risk. If you believe the system has not been inspected in line with the terms of the warranty, please contact us immediately. The price below excludes VAT. Parts that are damaged or have suffered fair wear and tear are chargeable.

Six Monthly Safety Critical Inspection Cost: From ██████████ Plus VAT - Per Machine / Install

Customer Installation Requirements & Guidance

- Equipment must be on a clear and level ground
- During the hours of darkness adequate lighting must be provided
- Full 360 degree access to the machine including unobstructed doors and hatches is required
- Machines must be cleaned down and cold prior to our engineers starting work
- Machines must be fully operational prior to engineers starting work
- Engineers must be provided with all the necessary keys and safety lockouts prior to starting work
- All required isolations, electrical or otherwise will be carried out prior to commencement of work

Our engineers reserve the right to refuse to work if they believe the risk or environment is in breach of our health and safety policies. Delays incurred rectifying breaches will be fully chargeable.

Installations cancelled within 7 days of the installation date will incur a charge of ██████████
