

 GREENOLOGY <small>FUELLING THE FUTURE</small>	TEMPLATE		DUST MONITORING FORM			
	REF	ENV016	Version:	I	Date:	12-09-2021

Only to be used in conjunction with the Dust & Emissions Management Plan.

Section 1 – Initial observations	
Date	Time
Person undertaking inspection:	

Section 2 – Preliminary inspection of site and infrastructure (tick appropriate box)		
	Yes	No
Is dust being generated from working areas?		
Is the shredder dust suppression system working as required?		
Are the shredding bay covers appropriately secured?		
Are the granulation bay doors shut?		
Is dust being generated from the pyrolysis areas?		
Is there evidence of any spillages?		
Is there evidence of dust 'staining'?		
Is dust being carried to the site boundary?		

Section 3 – Activities to be carried out in response to section 1 and 2 (tick applicable activities)			
Loading/unloading of materials		Granulating of materials	
Shredding of ELT		Other (please specify)	

Section 4 – Observations made throughout the day
Times of inspections
Has the emission changed since the initial inspection and are emissions now causing a nuisance? If yes, stop activities immediately. Detail response in S5.
Is the equipment working as required?
Describe the nature of the emissions (dust, grit, sand etc.)
Describe the extent of the emission (immediate vicinity, site boundary etc.)

Section 5 – Mitigation measures

Describe the measures that have been taken to control the emissions.

Section 6 – Restarting operations

If operations were stopped, outline why they can be resumed.

Time operations resumed:
